Dear Joel,

From all of us at POW, thank you for **Epic Water Filters'** generous **in-kind donation worth \$5,250** which we received on August 30, 2022. With your support, we are building, diversifying and strengthening the Outdoor State to become the most influential and impactful voice for climate in the United States.

The stakes couldn't be higher and time is running out - but we believe that solving the climate crisis is not only possible, it's within our reach. It's going to take:

- Making climate a top policy priority for local, state and national leaders;
- Rapidly deploying technological solutions and financial capital to advance our clean energy future;
- Spurring a cultural shift, where taking action on climate is no longer an option, *it's just what you do.*

And it will take all of us. United by our love of the outdoors and the common ground that connects us, POW is proud to be the place where the outdoor community comes together, gets inspired and takes action for climate. **We are the Outdoor State, and when we act together, we are bigger and more powerful than any state in the country.**

We know the path ahead is steep and has plenty of challenges. Fortunately, getting to the summit of an extremely hard climb is what we are built for and what POW does best. We're grateful you're here on the path with us.

Sincerely,

Justin Van Saghi, Strategic Partnerships Manager
