

## FIND THE PERFECT MATCH

### FOR RECTANGULAR TABLES...

Rectangular tables (above) work beautifully in spaces of all shapes and sizes, from squeeze eat-in kitchens to elegant dining rooms. Pair rectangular tables with low-back chairs in rounded shapes so the space feels warm and welcoming. For a more formal look, opt for chairs that have tall backs and long lines, such as a Parsons or Shaker-style chair.

### FOR SQUARE TABLES...

Square tables (above) are great for smaller spaces and work beautifully with square chairs with boxy forms and low backs. You could opt for a classic shape, such as the cross back that has a provincial style and is made for mixing and matching, or if you're after clean, sweeping lines, go for a chair inspired by the simplicity of mid-century modern design.
