## AAFCO

### STATEMENT:

Complete and balanced maintenance diet. Appropriate for all life stages.

## SUMMARY:

The diet provides high levels of protein and moderate amounts of dietary fat and is suitable for all life stages including the growth of large sized dogs. It is a highly digestible diet, low in insoluble (bulk-forming) fiber but with moderate amounts of soluble (prebiotic) fiber for dogs predisposed to recurrent gastroenteritis of unknown cause. Protein levels should support lean body mass. Mono- and poly-unsaturated fatty acids support normal skin and coat health without producing a high fat diet.
