

# PANCREATIC SUPPORT: COD + SWEET POTATO

<b>INGREDIENTS :</b>	White Fish, Sweet Potato, Banana, Yellow Bell Pepper, Magno, Cabbage, Organic Extra Virgin Coconut Oil, Sunflower Oil, Fish Oil, Calcium Carbonate, Choline Bitartrate, Cumin Magnesium Oxide, Zinc Gluconate, Ferrous Sulfate, Kelp, Pantothenic Acid, Niacin, Selenomethionine, Manganese Gluconate, Copper Gluconate, Thiamin HCl, Riboflavin, Pyridoxine HCl, Cholecalciferol, Retinol, Biotin, Folic Acid, Cyanocobalamin
----------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<b>AAFCO STATEMENT:</b>	Formulated for the long-term feeding of dogs with pancreatitis.
-------------------------	-----------------------------------------------------------------

<b>SUMMARY:</b>	The diet provides moderate protein levels and extremely low fat concentrations (just at the recommended allowances) to support recovery or maintenance following acute or chronic episodes of pancreatitis. Highly-digestible foods with low allergenic potential for dogs with possible food allergy or adverse food reactions. Medium chain triglycerides are included for absorption by portal circulation to bypass lymphatic circulation. Polyunsaturated fatty acids promote normal epidermal barrier. Cod provides excellent palatability. Blended fiber sources are included.
