----------------------	---

AAFCO STATEMENT:	Formulated for the long-term feeding of dogs with IRIS Stage 1-4 chronic kidney disease
-------------------------	---

SUMMARY:	The diet provides 50% or more protein than other renal diets but with similar levels of phosphorus restriction, in order to maintain or improve lean muscle mass while reducing progression of underlying kidney disease. Elevated EPA provides anti-inflammatory action and levels consistent with previous studies suggesting a benefit in renal disease patients. Pumpkin provides soluble fiber for normal gastrointestinal motility and to serve as a prebiotic. Highly palatable, elevated fat sources are included to encourage normal appetite.
