X CONTRAINDICATIONS

- Dogs with kidney disease
- Dogs with pancreatitis
- Puppies, pregnant or lactating dogs
- Dogs with cystine uroliths
- Dogs with a beef or egg allergy

ADDITIONAL INFORMATION

Formulated for the long-term feeding of dogs with bladder stones (calcium oxalate uroliths or struvite uroliths)

Our Urinary Support: Beef + Rice diet provides high levels of fat and a moderate level of protein. It's formulated for the long-term daily feeding of dogs with bladder stones (calcium oxalate or struvite) in all stages of life. This diet provides controlled amounts of calcium and other minerals to control calcium oxalate uroliths growth and reduce the recurrence of struvite uroliths.
