Energetic Release - a synonym for well-being

We all have different motives to go out riding our bike. What connects us is the urge to see new things powered by nothing but what's left in our legs. Throughout the city, high up in the mountains there might be a novel experience around every corner, every switchback or mountain pass. Taking inspiration from this spiritually cleansing act of exhaustion, we searched for stones that will support you on this act of endurance. Naturally symbols like Yin and Yang, our signature logo, the universe and finding your own pace come to mind in this context - all resembled by individual socks and bidons.

YING & YANG

Yin & Yang is symbolic for two polarizing forces, that - instead of conflicting - still support one collective goal. Whether it be the headwind turning into a tailwind on your way back home. The flowing descent after a steep ascent or the midday sun waiting for you after an early cold start.

ENERGETIC RELEASE — a synonym for well-being

FIND YOUR PACE

A claim to remind you that numbers aren't everything in this sport. Sometimes it's refreshing to just listen to your body and go with the flow - to find your pace.

UNIVERSE

The universe merges everything we know and all the things we don't as one. So many memories are yet to be made relying on your experiences from the past on the way there.

—
protects body and soul
keeps negative influences away
relieves pain
muscles are strengthened
nervous system is relaxed
—

—
builds endurance
confers energy
strengthens willpower
teaches mindfulness
gives inner peace
—

—
calms nerves and heart
immune strengthening
gives courage
strengthens self-confidence
lucky charm
—

—
sustainable endurance
strengthens self-confidence
gives strength
stabilizes the circulation
ensures creativity
—

Feel the relaxation of your nervous system. Combined with strengthened muscles chronic pain and injuries will be a thing of the past. The absence of negative influences will forever protect your body and soul and guarantee for a calm heart. We pour our heart out, leave so much energy on the roads that lead up to the climbs and even more on the climbs themselves.

Build more endurance through better energy resources and your willpower coming at play. Reach new highs through movement that will teach you mindfulness and eventually lead to inner peace.

The immune strengthening properties with added self confidence will improve your physical health in the long run. Add a bit of luck and you will notice a calmer self. New found courage will lead you to be a better athlete and person in general.

Your new found strength with stabilized circulation will lead to more sustainable endurance efforts. Throw a new found level of self confidence in the mix and benefit from constant creative output. No hurdle will be too big for you.

Socks / LIGHT MERINO SILK

FINGERSCROSSED LIGHT MERINO SILK SOCKS are your ideal choice when you don't feel like making choices. Made from a merino, silk and polyamide blend the fabric's natural temperature and moisture control properties add to the performance character while still offering the highest amount of comfort. Less fabric around the instep equals more breathability making the socks the right choice even when the temperatures still rise throughout the day. The sole area is reinforced from the toes towards the heel for added durability.

Socks / ECO

GIVE OUR PLANET A CHANCE TO BREATHE

The same way your body has to regenerate after a long day in the saddle, we have to give our planet a chance to breathe.

This collection is made from ECONYL® regenerated nylon yarn, striving for a more sustainable and circular future - Now in updated colours.

Nylon waste, otherwise polluting the Earth, is transformed into ECONYL® regenerated nylon. It's exactly the same as brand new nylon and can be recycled, recreated and remoulded again and again. This way we can create new socks without having to use new resources.

With FINGERSCROSSED Eco we strive for a more sustainable and circular future.

Socks / AERO

FINGERSCROSSED AERO is a sock made from a combination of nylon & elastane. The structure of the upper part of the sock ensures maximum aerodynamics saving up to four watts per hour.

The seamless toe and the elastic fit contribute to a high wearing comfort. Non-slip silicone fabric on cuff. Compression band for more stability at the instep.

Triangle Scarf

Dip it in water on a hot summer day to stay cool from the neck downwards and protected from the sun. Fold it for extra warmth during the colder months or just tie it as it is for added style points.

The highly-functional fabric will be the right choice in any situation - even off the bike for a casual hike, day at the beach or skiing adventure. An iconic item newly interpreted.

Bikestands / + - / 90°

PlusMinus - the name says it all. Our all new bike stand takes inspiration from the mathematical symbols emblematic of the restrained, minimalist design. The bike can thus be stored safely without taking up much space and still unfold its shine. The plus serves as a stable base, while the minus forms the delicate suspension.

The aesthetic of 90° is an integral aspect of its usefulness. The clear and functionally timeless design showcases your bike in a unique way while seamlessly blending in with any interior style.

Socks / MERINO

FINGERCROSSED MERINO* WINTER SOCKS are ideal for late autumn, early winter & early spring. A reflective safety strip specially designed for the area between your leg warmers and your shoe increases your safety in the dark & during the months when it quickly gets dark outside. An integrated toe cap surrounds your toes up to the verse in the form of an extra reinforcement of the material.

Socks / OVERSOCKS

Today our highly technical cycling shoes are equipped with the best ventilation systems, which can be a problem in the colder season. In order not to hinder this breathing function, the FINGERSCROSSED Oversocks continue to ensure this process and protect your foot from external influences such as wind and dirt. We recommend this product especially in autumn. Combined with our FINGERSCROSSED MERINO sock, it will also get you through the colder season.

Gloves / MID SEASON

A glove with light insulation for cold mornings, protection against the occasional shower or mountain tops. Easily packable in your jersey pocket it's the item you shouldn't miss throughout your base training or cold weather intervals.

Brushed fleece lining and laser-cut seams make for great next to skin comfort. The gridded rubber pattern stretching over the palm will give you a secure grip on any position on your handlebars. A lens wipe on the index-finger makes rain or snow disappear from your glasses within seconds. Touch-screen compatibility lets you check up on the route or latest messages without taking off your gloves.

Gloves / WINTER

The FINGERSCROSSED Winter Gloves are made with a water-resistant and windproof neoprene upper to ensure optimal protection against the elements. Full-insulation will get you through your toughest training months. Designed with an on-bike approach the upper prevents you from overheating and the padded palm offers superior comfort for long rides without being too bulky. This will give you maximum security on your handlebars and shifters even after hours out in the cold. Touch-screen compatibility lets you check up on the route or latest messages without taking off your gloves.

Shoe Cover / OVERSHOES RAIN

The FINGERSCROSSED Rain Overshoes will protect you like a rain shell in the harshest conditions. Constructed from a waterproof and windproof material and a tight seal on the legs your feet will stay dry all day. Silicone grippers on the legs will keep the Rain Overshoes fitted even after hours in the saddle. The velcro closure on the bottom ensures easy on and easy off making them an essential item for those days you are unsure about the weather forecast or bike-packing trips. Reflective elements maximize visibility in the darker months.

15% Elastane

Shoe Cover / OVERSHOES WINTER

The FINGERSCROSSED Winter Overshoes are constructed from a water-resistant and windproof upper. Brushed fleece lining for added warmth while still not bulking up and preventing you from overheating. The silicone grippers on the legs will keep the Winter Overshoes fitted even after hours in the saddle. The waterproof zipper on the back for easy on and easy off is equipped with reflective elements. A velcro closure on the bottom adds to the ease of use.

Shoe Cover / TOE CAPS

Love it or hate it - the FINGERSCROSSED Toecovers will save the day. Use it as a stand alone or layering piece with our Oversocks, the neoprene construction will guarantee to keep your feet warm. An integrated pull-tab lets you easily take them on and off making them the ideal item for when you want to shed some layers throughout the day. Silicone grippers ensure a good fit even after hours in the saddle.
