

Vertical Band Saw Guard

Part # VB-ES1

Machine application: Most small to mid-size vertical wood and metal-cutting band saws.

See page 2 for technical info

- Easy to install. The guard can mount to the front door using the supplied bracket, or side of the upper housing.
- Constructed from 28mm industrial aluminum extrusion
- Slotted aluminum allows adjustment in/out and up/down to clear the workpiece and guard the vertical band saw blade at different heights.
- Steel adjustable lever for easy re-positioning
- Shield can flip upward 180 degrees for access.
- 1/4" thick lexan shield. Dimensions 6" wide x 7" tall
- Replacement shields available. Taller/ custom shields also available upon request.
- Powder coated PPG's "OSHA Safety Orange"

Standard shield dimensions shown.

Taller shields available upon request.
