

## Alert Whistle

The engineering polymer of the Alert Whistle is extremely strong, yet feather light. The Alert Whistle may be attached to a keyring or lanyard by the chrome plated split ring.

The black whistle is available alone for every day carry. A black breakaway lanyard is useful when directing traffic. A red lanyard edition is available for training.

The piercing tone of the Alert Whistle is the result of advanced sound engineering, a Spanish cork ball and rigid frame design. The sound is distinctive and intense.

Whistle	56291
Duty Whistle (Black Lanyard)	56293
Training Whistle (Red Lanyard)	56290
