

Personal Safety Defenders®

- Police Strength
- Low Profile
- Easily Carried
- Quick Firing

Palm Defender

Key Defender

ASP products are designed to professional law enforcement standards. They have gained a worldwide reputation for performance. This same precision technology has created a new generation of personal safety devices.

The ASP Defender® Series is precision machined from high strength aerospace aluminum. Bright dip industrial anodizing is accented by an injection molded Delrin® safety. The solid brass keyring swivel retains two heat treated, black chrome plated split rings. Both the dispersion tip and retention cap are o-ring sealed. The safety is positive and secure. Release requires two distinct movements. Straight line activation places a cone-shaped spray on target . . . even in the dark. The result is a low profile, devastatingly effective aerosol dispenser.

Each Defender combines the innovative design and unparalleled manufacturing expertise of ASP. O-ring sealed for integrity. Performance tested for function. Individually date coded for reliability. ASP Defenders are unmatched in function, durability or performance.

ASP Defenders . . . Your Key to Personal Safety

Select the Palm Defender® for discrete personal safety. The Key Defender® provides increased capacity.

The world's smallest aerosols.
Test® Training or **Heat®**
 Oleoresin Capsicum
 Inserts are replaceable.

Background

- Designed to professional law enforcement standards
- Aerospace aluminum construction
- Precision machined
- No sharp edges
- O-ring sealed
- Interchangeable components
- Replaceable aerosol Inserts

Specifications

| | Palm | Key |
|----------|--------------------------|----------|
| Length | 4.5" | 5.75" |
| Diameter | 0.625" | 0.625" |
| Weight | 1.8 ounces | 2 ounces |
| System | Straight line activation | |

Body

- 6061 T6 aerospace aluminum construction
- Fine line knurling
- Bright dip industrial anodizing
- Coated threads for durability

Safety

- Extremely secure
- Rapidly released
- Stainless steel hinge pin
- O-ring retained
- Replaceable safety
- Injection molded Delrin®
- Wraparound design
- Positive activation blockage
- Non-engagement indication

Detachables allow convenient key separation.

Activation

- Keyring attachment
- Swivel design
- Solid brass actuator
- Requires two distinct movements to activate

Tip

- O-ring sealed
- Tapered stem seat
- Precision machined dispersion port

Cap

- O-ring sealed
- Blind hinge pin hole

Split Rings

- Progressively sized
- Extra heavy wire
- Heat treated for toughness
- Black chrome plated

Inserts

- Readily replaceable
- World's smallest aerosol cans
- Seamless aluminum
- Impact extruded
- Precision spring valve
- Extra long ferrule
- Gasket sealed
- Horizontal discharge
- Cone-shaped dispersion

Test

- Inert
- Training module

Heat

- Oleoresin Capsicum
- 2 Million Scoville Heat Units
- 10% formulation
- Optional custom formulations
- Laser engraved expiration date

Palm Defender Inserts

- 3 grams
- Three one-half second bursts
- Effective range three feet

Key Defender Inserts

- 4 grams
- Six one-half second bursts
- Effective range five feet

Repair

- Maintenance Kit

Warranty

- Limited Lifetime

Palm Defender Inserts

Key Defender Inserts

Defender Inserts are compact, easily replaced and date coded to assure reliability.
