

KITS

Kitted Integrated Tactical Systems

ASP KITS bring together an integrated set of the six most used pieces of police duty equipment. Each is a unique tactical system that has been carefully designed and purpose built. They provide specific collections to simplify in-store bundled purchases.

Individual KIT components are rugged, reliable and street smart. The designs have been field proven over decades of use by law enforcement officers around the world. They are the gold standard for performance and value.

ASP KITS are packaged in a ballistic weave roll bag. They have four color coded pockets, a heavy nylon coil zipper and settable 3 disc combination lock. KIT bags may be locked for on-shelf display. Embroidery of specific agency logos is available.
