

Keepers

- Custom Design
- Top Grain Leather
- Precise Fit
- Secure Retention

ASP Keepers are designed for retention. Each Keeper in the series is constructed from premium top grain American cowhide. They provide long years of service. The Keepers assure a precise fit and secure retention of duty accessories. These custom designs are both unique and functional.

Belt Keepers are packaged in sets of four single or two double wide retainers. Each Keeper employs custom duty snaps which are sandwiched between two layers of top grain leather. The Keeper is then outlined in nylon cord stitching and edge finished. The hidden snaps present a neat, clean appearance on the duty belt. They securely retain alignment of the duty belt, under belt and equipment.

Belt Keepers align the duty belt, under belt and equipment.

Double Wide Belt Keepers allow precise positioning of equipment on the duty belt.

ASP Keepers . . . Position and Retain

Light Keepers retain Guardian CR lights on a duty or dress belt. Industrial grade shoe elastic positions the light for dependable backup on the duty or dress belt. Their hook and loop attachment is secure and infinitely adjustable.

Light Keepers are slim, compact and match the duty belt.

Knife Keepers provide rapid access to Edge or Investigator utility knives. A custom split ring provides immediate access to these miniature ASP pocket tools. The Keeper is adjustable to both duty and dress belts.

Knife Keepers retain Edge or Investigator mini tools. Their split ring provides instant access from a duty or dress belt.

AutoKey Keepers are molded leather form fit carriers for the AutoKey. They are matched with a custom ASP split ring for rapid access. The Keeper is adjustable for either duty or dress belts.

AutoKey Keepers carry and secure the AutoKey. Their split ring provides rapid presentation of the handcuff key.
