

Keepers

ASP Keepers are designed for retention. Keepers in the series are constructed from premium top grain American cowhide. They provide long years of service. The Keepers assure a precise fit and secure retention of the duty belt. These custom designs are both unique and functional. They are available in Black top grain leather, Basketweave, Ballistic and ASPtec®.

- Custom Design
- Top Grain Leather
- Precise Fit
- Secure Retention

Belt Keepers align the duty belt, under belt and equipment.

Double Wide Belt Keepers allow precise positioning of equipment on the duty belt.

Belt Keepers are packaged in sets of four single or two double wide retainers. Each Keeper employs custom duty snaps which are sandwiched between two layers of top grain leather. The Keeper is then outlined in nylon cord stitching and edge finished. The hidden snaps present a neat, clean appearance on the duty belt. They securely retain alignment of the duty belt, under belt and equipment.

Light Keepers are slim, compact and match the duty belt.

Light Keepers retain Garda CR lights on a duty or dress belt. Industrial grade shoe elastic positions the light for dependable backup on the duty or dress belt. Their hook and loop attachment is secure and infinitely adjustable.
