SWAT/Tactical (=

One of the Facing I

>>> ASP's Keepers serve to help create a "friendlier" duty belt by making better use of scarce duty belt real estate by providing a mini "holster" for some small but important tools:

- The AutoKey Keeper securely stows ASP's, push buttonopening automatic handcuff key
- The Edge Knife Keeper holds the ASP Edge Knife
- The Flashlight Keeper keeps an ASP Guardian CR flashlight at the ready.

Traditional single and double-width Keepers (for belt retention only, no tools or pockets) are also available. All of the products in the Keeper family are crafted of top-grain cowhide. Tool Keepers feature adjustable hook/loop fasteners, while traditional Keepers secure with double snaps.
