

# Metro Defender Transition

- Our original **Palm and Key Defenders** have been re-named **Metro Defenders**. You may see mixed inventory on retail shelves or websites, but only the names and packaging are materially different.
- The original **Palm size Heat and Test Inserts** are now called “**D1**” inserts, and the original **Key size** is now “**D2.**” This will make it possible for us to add a variety of new products that accommodate the same Inserts.
- The **Insert sizes and compatibility are identical to the originals, only the name and labeling have changed.** An Insert labeled “Palm” is identical to an Insert labeled “D1.” It is compatible with the original Palm Defender, the small size Metro Defender, and all new Defenders to be introduced in the D1 size.

## Metro Defender Identification

Metro Defender D1 (formerly Palm Defender)

Metro Defender D2 (formerly Key Defender)

## Defender Insert Compatibility
