

Carabiners

ASP Carabiners are designed to identify and connect. 2.5" and 3.5" Carabiners are available in four colors (Black, Gray, Coyote, Yellow). They provide a rapid way to label specific bags of equipment in the training or tactical environment. As a connector, the designs are lightweight, rugged, robust and rustproof. They are not designed for climbing. However, 2.5" ASP Carabiners will support 110 lb. (49 kg). 3.5" Carabiners will hold approximately 275 lb. (124 kg) of equipment. Each design is the result of sophisticated stress analysis. Each angle, rib and recess serves a specific purpose. The result is a series of easily identified supports for the trainer, adventurer or tactical officer.

- Exclusive Design
- Lightweight
- Vivid Colors
- Stainless Spring
- Interlocking Clip
- Robust Support
