PRODUCT SHOWCASE

▶ **Enhanced Red Guns**

Enhanced Red Guns from **Armament Systems and Procedures (ASP)** is the latest generation of the company's iconic line of safe replica training weapons. The new Enhanced variants feature removable magazines, adding realistic yet safe reload manipulations to the Red Gun's benefits. ASP Red Guns have been a fixture in law enforcement military training, as well as civilian self-defense instruction, for many years. Defensive tactics and martial arts instructors favor the solid polymer pistols, rifles and knives as they allow for real-world training without the safety risks or property concerns of having actual weapons in the training environment.
