

OC Defenders®

- Police strength pepper spray
- Slim, discreet design
- Easy to carry
- Quick to deploy

ASP products are designed to professional law enforcement standards. They have gained a worldwide reputation for performance. This same

precision technology has created a new generation of personal safety devices.

The ASP Metro Defender® is precision machined from high strength aerospace aluminum. Bright dip industrial anodizing is accented by an injection molded Delrin® safety and forged steel pocket clip. The solid brass keyring swivel retains a heat treated, black chrome plated split ring. Both the dispersion tip and retention cap are o-ring sealed. The safety is positive and secure. Release requires two distinct movements. Straight line activation places a cone-shaped spray on target . . . even in the dark. The result is a low profile, devastatingly effective aerosol dispenser.

The Sport model is a lightweight but tough polymer option. It has a tapered and faceted body, with all the same features, quality and performance as the Metro Defender.

Each Defender combines the innovative design and unparalleled manufacturing expertise of ASP. O-ring sealed for integrity. Performance tested for function. Individually date coded for reliability. ASP Defenders are unmatched in function, durability and performance.

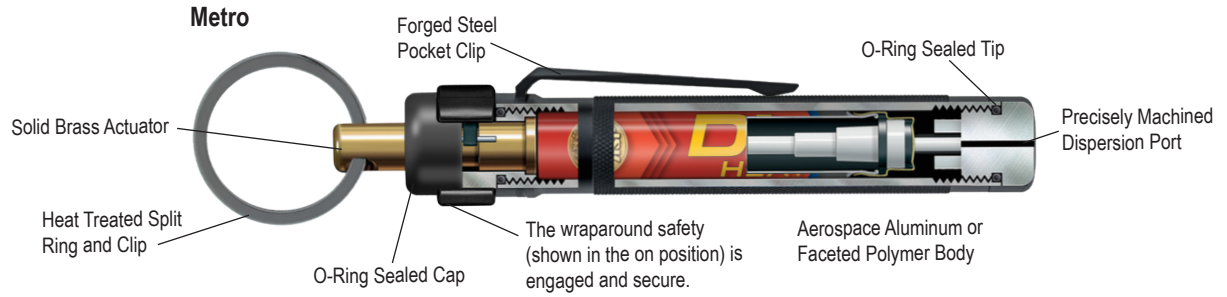

Metro

Sport

Defender . . . High Performance, Low Profile

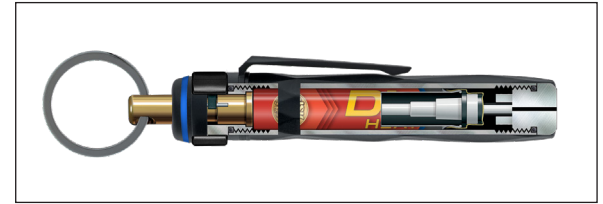

D1 Defenders are ultra compact. D2 Defenders are longer to provide increased capacity.

The safety (shown in the off position, ready to activate) is rapidly released.

Sport

Background

- Designed to professional law enforcement standards
- Aerospace aluminum or Molded Polymer construction
- Precision machined
- No sharp edges
- O-ring sealed
- Replaceable aerosol Inserts

Specifications

System	Straight line activation	
	Metro	
	D1 Defender	
Length	4.42"	11.2 cm
Diameter	0.87"	2.2 cm
Weight	1.9 ounces	55 grams
	D2 Defender	
Length	5.75"	14.6 cm
Diameter	0.87"	2.2 cm
Weight	2.4 ounces	67 grams
	Sport	
	D1 Defender	
Length	4.23"	10.7 cm
Diameter	0.87"	2.2 cm
Weight	1.5 ounces	43 grams
	D2 Defender	
Length	5.56"	14.1 cm
Diameter	0.87"	2.2 cm
Weight	1.8 ounces	50 grams

Metro Body

- 6061 T6 aerospace aluminum construction
- Fine line knurling
- Bright dip industrial anodizing
- Textured powdered paint finish
- Coated threads for durability

Sport Body

- Injection molded
- Ordnance polymer
- Faceted
- Machined aluminum cap

Safety

- Extremely secure
- Rapidly released
- Stainless steel hinge pin
- O-ring retained
- Replaceable
- Injection molded Delrin®
- Wraparound design
- Positive activation blockage
- Non-engagement indication

Activation

- Keyring attachment
- Swivel design
- Solid brass actuator
- Requires two distinct movements to activate

Clip

- Forged Steel
- Black Chrome Plated

Tip

- O-ring sealed
- Tapered stem seat
- Precision dispersion port

Cap

- O-ring sealed
- Blind hinge pin hole

Split Ring

- Extra heavy wire
- Heat treated for toughness
- Black chrome plated
- Clip forged heat treated

Inserts

- Readily replaceable
- World's smallest aerosol cans
- Seamless aluminum
- Impact extruded

- Precision spring valve
- Extra long ferrule
- Gasket sealed
- Horizontal discharge
- Cone-shaped dispersion

Test

- Inert
- Training module

Heat

- Oleoresin Capsicum
- 2 Million SHU
- 1.33% Major Capsaicinoids
- 10% formulation
- Optional custom formulations
- Laser engraved suggested replacement date

D1 Defender Inserts

- 3 grams
- Six one-half second bursts
- Effective range five feet

D2 Defender Inserts

- 4 grams
- Twelve one-half second bursts
- Effective range five feet

Warranty

- Limited Lifetime
