

Protector Batons P12, P16, P21

The P12, P16 and P21 Batons provide administrators, investigators and undercover operators with an Every Day Carry (EDC) Friction Loc® Baton. Each expandable design provides easily concealed striking power. These are easy carry batons with the world class striking potential of an ASP impact weapon. Each is fabricated using ASP materials and ASP manufacturing techniques. They are finished using ASP coatings. Each P Series Baton is produced to the same standard of quality that has been adopted by police professionals in over 92 countries around the world.

The P12, P16 and P21 are concealable. A 4140 striking surface is combined with a forged to shape 7075 T6 aluminum middle shaft and precision machined handle. The grip is fine line, Crosstec knurled with spiral micro grooves. The grooves accept Nexus baton clips. Batons can be carried tip up or tip down. The clip can be adjusted to a variety of positions along the handle to enhance concealment or ease presentation. Whatever the activity, these batons are easily carried and rapidly presented. A constant companion for control and defense.
