

Rigid Ultra Cuffs

ASP Rigid Handcuffs may be used to control the most resistive subject. Their design provides a secure structure that allows an officer to stabilize without impact. The rigid configuration offers the most restrictive structure of the ASP Tactical Series. It removes both lateral and linear mobility. For this reason, Rigid Cuffs are ideal for courtroom or airline restraint.

ASP Rigid Handcuffs feature a reinforced bridge in the center of an ergonomic grip. The contoured hand guard maintains a clear path to the bow guides. As with all ASP Tactical Handcuffs, the Rigid design incorporates a forged 7075 alloy frame, dual keyway, high visibility double lock indicator, high contact conical bow, radiused edges, increased range of adjustment for both large and small wrists, smooth bow action and single direction unlock. The radiused design reduces injury potential from excessive lateral stress. Thin. Lightweight. ASP Rigid Handcuffs. Providing officers with a new hold on control.

Rigid Ultra Cuffs . . . a New Hold on Control

Replaceable Lock Sets are also available in two, three and slip pawl designs.

Background

- Precision forged
- High contact face
- No sharp edges
- Lightweight
