

Safety Set

The Safety Set was designed by ASP, a company with a long history of providing premium products to the law enforcement community. Each component is of police quality. These are the same designs utilized each day by enforcement professionals.

The system begins with a Breakaway Lanyard. It has a “soft hand” for constant wear. It leaves both hands free, yet will break away in an emergency. The Defender OC provides 2 million Scoville Heat Units of pepper spray protection. The Alert Whistle is incredibly intense and piercing. The Sapphire USB is small, bright and rechargeable. It has 20 lumens of LED light.

These four components come together to create a protection system only possible from a company with a four decade career of protecting the police. The result is a professional grade set for those who are serious about personal safety.

LED Light, Pepper Spray, Whistle

Breakaway Lanyard
