The XT DF flashlight from ASP offers an intense 600 lumens of primary illumination, with a user-programmable secondary light level at 15, 60, or 150 lumens, or strobe. The XT DF light is activated via a single pressure twist selector on the tail cap, and the three-position twist selector allows the choice of intermittent, constant-on or locked. When recharging the 18650 battery isn't possible or convenient, ASP's Dual Fuel technology allows it to be swapped out for two CR123A cells (available separately). The XT DF comes with a rechargeable 18650 battery, battery storage case, retractable charging cord, AC wall adapter, 12V car adapter, removable pocket clip and zippered ballistic storage/travel case.

WWW.IWI.US

IWI US, Inc. is the U.S. subsidiary of Israel Weapon Industries (IWI) Ltd. of Ramat Hasharon, Israel and a member of the SK Group, a leading group of companies operating in the global defense and security markets.
