

Counter Mats

ASP Counter Mats are available in two alternative designs. Pocket mats measure 15" x 12". They come with an embroidered insignia, soft cover, turned edges and stay-in-place elastomeric base. Their internal pocket is ideal for fact sheets and other often consulted reference materials. They are sized to be carried in an attache or sample case.

Multi-color exploded ASP view mats measure 20" x 15" and are intended for long term use on a glass counter or table top. They detail major ASP products (Batons, Restraints, Lights) showing components, construction and part numbers. The mats are soft, durable and non-abrasive. The protective designs are colorful and extremely informative. View mats have bound edges with a non-slip base.

ASP Counter Mats provide a protective surface while presenting and explaining the design and function of ASP designs.
