

Scribe®

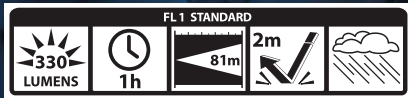

The Scribe® has the dimensions and feel of a fine writing instrument. It is easily carried in a suit pocket, shirt or pants. The rear button activation is instantly accessible, rapid and quiet.

The Scribe is a one hand light. There are no complex settings, elaborate activation codes or secret functions. A simple push of the button provides brilliant intermittent or constant illumination. A double tap gives instant access to a low output second level.

The uniqueness of the Scribe is the amount of technology that has been compressed into the form factor. Each Scribe is built to professional law enforcement standards. A precision ground glass lens is optically clear. The heat treated pocket clip is replaceable. A constant current circuit board drives a Cree XPG LED. A heat management system controls the body temperature of the light. The mirror polished aluminum reflector provides a penetrating central beam with a room illuminating halo.

The Scribe runs on a 10900 Lithium-ion power cell or universally available AAA batteries.

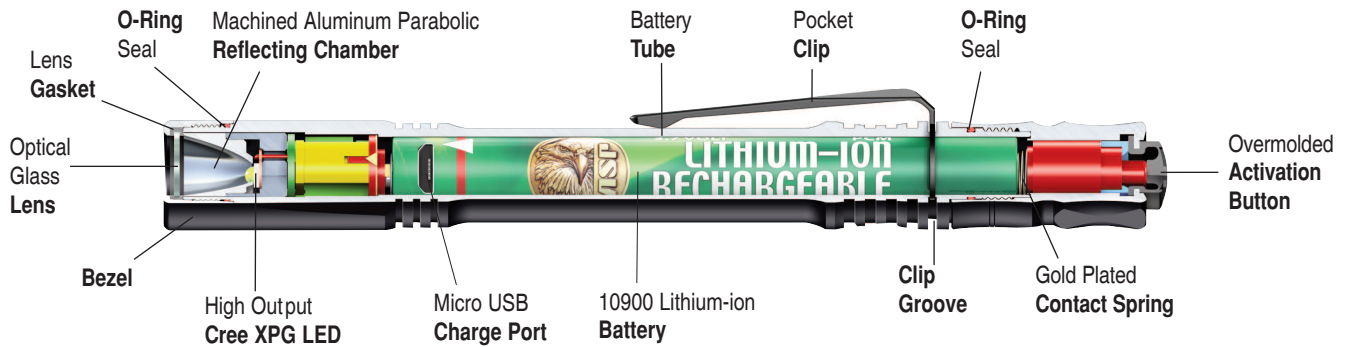

Easily carried. Conveniently clipped. Incredible intensity at the touch of a button. The ASP Scribe. Simply Brilliant.

- 330 Lumens (ANSI Standard)
- 1 Hour Run Time
- Micro USB Rechargeable
- Battery Capacity Indicator
- Black Type III Hardcoat Anodizing

Scribe . . . Simply Brilliant

Background

- Designed to professional law enforcement standards
- Aerospace aluminum construction
- Precision machined
- No sharp edges
- O-ring sealed for maximum water resistance
- Distinct profile

Specifications

Length	5.5"	139.7 mm
Diameter	.75"	19.1 mm
Weight	2.2 ounces	62.4 grams
	(with batteries)	
System	3 volt	
High Output	330 lumens	
Low Output	15 lumens	
High Run Time	1 hour	
Low Run Time	23 hours	

Body

- 6061 T6 high strength aluminum
- Matte black Type III hardcoat anodizing
- Coated threads for durability
- Exterior and interior scratch and corrosion protection
- Rear clip groove

Clip Set

- Detachable pocket clip

Switch

- Back mounted
- Quick and positive switch location under stress
- O-ring sealed activation button
- PC board positive circuit contact
- Sensitive and quiet switch activation
- Computer micro switch controlled
- Self-cleaning (no carbon buildup)
- Fail safe (backup) switch circuits
- Replaceable modular switch assemblies
- Rotate one full turn to prevent accidental activation
- O-ring sealed switch cover

Dual Fuel Technology

- 10900 Lithium-ion rechargeable
- 2x AAA primary cells
- PTC protection circuit
- Safety vents
- Leak proof
- Vibration resistant
- 10 year shelf life

Reflector Assembly

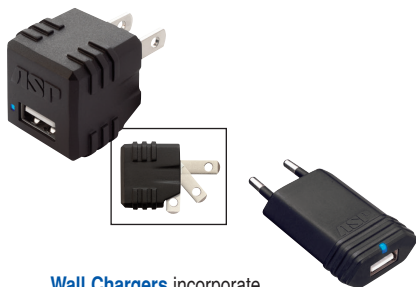

- Extremely durable
- Non-dulling metalized surface
- Computer calculated parabola
- Long distance penetrating beam
- Room illuminating halo
- Tempered optical glass lens
- Gasket sealed

LED Assembly

- Proprietary heat management
- Custom driver
- Smart chip technology
- Gasket sealed

Warranty

- Limited Lifetime

Wall Chargers incorporate easy pull finger grooves that aid removal from an outlet. They are available for both US and EU receptacles.

Charge Banks accept 18650 cells. They recharge from a car port, wall outlet or computer.

Retractable micro USB cords have reversible charge plugs.
