

Agent® Infinity Batons A30, A40, A50

- Reduced Diameter
- Lightweight
- Adjustable Carry Clip
- Internal Disc Loc
- Push Button Release

The combination of discreet concealment and rapid presentation makes Agent® Infinity Batons an ideal impact weapon for administrators, investigators and undercover operatives. The batons incorporate a 4140 steel striking surface. The middle shaft and handle are forged to shape and then precision machined. The grip is fine line, Crosstec knurled with spiral micro grooves. Rings accept Nexus baton clips.

Agent Infinity Batons are available in all steel or aluminum. They expand to 30, 40 or 50 cm. They have the form, fit and striking potential of a duty baton. The reduced diameter and low profile grip of the Agent may be concealed inside the waistband or worn on the belt. The Nexus clip may be adjusted to a variety of positions along the handle to enhance concealment or ease of presentation. Agent Batons can be carried tip up or tip down. As with all ASP Disc Loc batons, the Agent Infinity is retracted with a simple push of the cap.

Chrome plated torsion spring
Locking band

Warranty

Limited Lifetime

Duty Scabbards are low profile, snap-on carriers that swivel 180°.

Duo Scabbards carry a Tungsten light and Concealable Baton.

Retract your Agent Baton by depressing the end cap as pressure is exerted against the tip.

Attach the Nexus clip to your Agent® Infinity Baton by sliding the baton ring over the handle. Insert the snap-in locking band into a selected retention groove.

Nexus Clips are removable. They may be repositioned along the length of the handle.
