

Ultra Plus Training Cuffs

The ASP Handcuff program employs an integrated series of Red Training Restraints for Tri-Fold, Chain and Hinge instruction. All ASP restraints are applied using the same Rock & Lock handcuff procedure. Training Restraints may then be rapidly removed using the Rotational Release procedure.

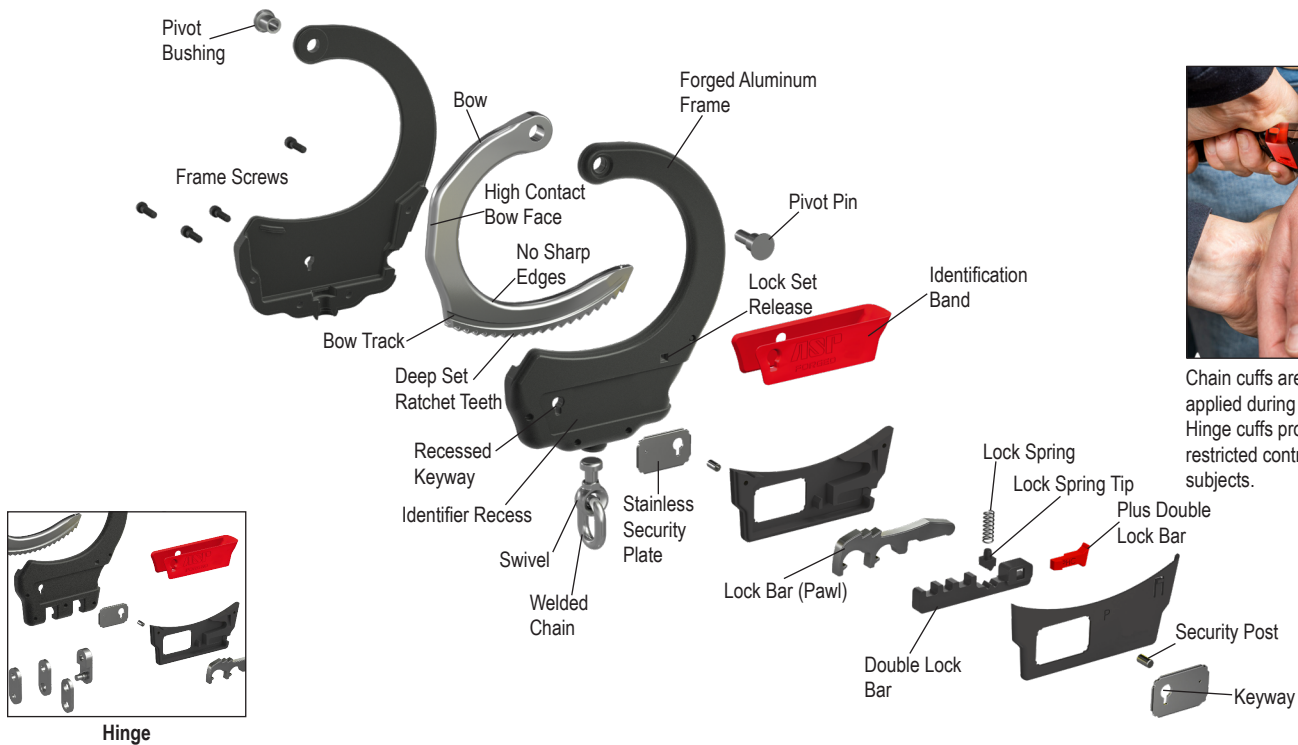

Training Restraint pawls are designed to disengage when subjected to continuous back pressure. The handcuffed student rolls their wrists to remove the cuffs.

Chain and Hinge Training Cuffs may also be double locked. Once the secondary lock is activated, hard cuffs can only be removed by using a key to release the pawl. This design feature allows progressive restraint training.

During ASP Handcuff training, students initially apply restraints to Training Batons and remove the cuffs by sliding them off. Next, students apply restraints to other trainees, having the subject remove the cuffs by rotating their wrists. Finally, hard cuffs are applied and double locked. Double and single locks are released with a key that is turned in the direction of the bow. This progressive training system maximizes restraint application while allowing officers to practice all components of the handcuff skill set.

Ultra Plus Training Cuffs . . . Rotational Release

Chain cuffs are more easily applied during a confrontation. Hinge cuffs provide more restricted control of large subjects.

Background

- Precision forged
- Keyless Double Lock
- High contact face
- No sharp edges
- Permanent color
- Extremely lightweight
- Interchangeable Lock Set
- Recessed keyway
- Two-sided lock release
- One-direction single and double lock release

Specifications

Length		
Chain	9.4"	239 mm
Hinge	9.125"	232 mm
Width	3.125"	79 mm
Weight		
Chain	9 ounces	255 grams
Hinge	11 ounces	312 grams
System	Replaceable Lock Set	
Construction	Forged aluminum	
Edge Radius	.035" minimum (1 mm)	

Frame

- Computer designed
- Forged Frame Technology
- Precision forged
- Heat treated
- Bow guides
- Spiral connecting pins
- Beveled keyways

Chain Link

- Stainless steel
- Free rotating swivel

Hinge Link

- Stainless steel
- Four point rotation

Lock Sets

- Replaceable
- Dual keyways
- Stainless security block
- Stainless security posts
- Color coded double lock indicator
- Dual release lock bar (pawl)
- Slip pawl (Red)
- Single spring double lock bar
- Hardened keyways

Bow

- Conical geometry
- Integral frame track
- Deep set teeth
- High contact face
- Serial numbered
- Stainless pivot pin

Warranty

- Limited Lifetime

Advanced Technology Cases are specifically designed for the ASP Tactical Handcuff Series of restraints.
