

MODEL # USB35AUX Installation Manual

Parts Included:

High / Low speed USB to
3.5mm AUX adaptor

Official AIS Programming Tool

MAKE SURE THE USB YOU ARE CONVERTING ACCEPTS DATA AND NOT JUST A CHARGING PORT

- 1) Plug the USB end of the USB35AUX into the selected USB port you are wanting to convert.
- 2) Select the USB input on the radio the corresponds with the input you are using,
- 3) Plug in the 3.5mm jack into the opening.
- 4) You should hear sound.

SOME VEHICLE'S WILL USE A LOW SPEED USB HUB. IF THERE IS NO SOUND WHEN THE DEVICE IS PLUGGED IN, FOLLOW THE INSTRUCTIONS BELOW.

- 1) With the USB plugged into the USB port, Using the official AIS programming tool "paper clip" , insert it into the small hole That is lit by a blue light. Press and hold until light inside the hole starts to blink. Once it starts to blink, release. Light will go solid. Once solid, test.
