PCP-SSP Software for PCP-USB Telemedicine Stethoscope Dedicated Stethoscope Software with Frequency Filters for Heart & Lungs

PCP-SSP software is designed specifically to work with the PCP-USB stethoscope. This in-band solution provides valuable features not available with the stethoscope alone.

APIs also available for Windows OS or for Chrome Browser for integration into Apple, Android & Linux platforms. Call for details.

- ➔ Simple, easy to use interface
- ➔ Software exclusively for the PCP-USB Stethoscope for no hassle signal processing
- ➔ PCP-SSP software installs on patient side only – No physician software to load – No physician training necessary
- ➔ Software integrates into audio channel of existing video conference platform
- ➔ Allows local listening at patient site – nurse or technician can hear what physician hears
- ➔ Five filter settings for best sound quality at different body sites plus new “Lung” setting to further enhance pulmonary diagnoses
- ➔ Auto mute of patient room mic when stethoscope in use
- ➔ Single one-time user license fee at patient site – No recurring charges - \$165 / license / stethoscope

FDA Approved for Telemedicine & HIPAA Compliant

Standalone Software Requires Windows OS on Patient Side PC
