Since 1992

## ABOUT PRACTICAL ART

Practical Art began in 1992 as a company that built custom furniture. The company was doing well, but it was not until Michael McNeil teamed up with Steve Pietens that the magic of Practical Art really started to take shape. Together they changed the business direction and began creating an extensive line of metal artwork that also serves a practical purpose. Since then the team has grown in size, but the foundation of the business remains the same, producing high quality unique metal work.
