Yes, Compassion IS Sexy;)

For the Animals, the Environment and our Health...

Made with **BRANDB**

MISSION POSSIBLE

Over 70+ billion animals (over 1 trillion, if you include fish) are slaughtered every year for human consumption, putting these animals in an unnecessary condition of pain and suffering, and causing disastrous damage to our environment. Also, the consumption of animal products causes diseases which can be prevented with a plant-based diet. Vegan Club wants this insanity to stop, and in order to achieve that, we need people to spread love through vegan apparel. We are an activist brand with the main goal of veganizing the world through the subliminal power of vegan fashion. Every time you wear our apparel, you assist in driving this necessary social change.

Welcome to the best club!

ABOUT THE ARTIST

Constantin Philippou, born May 21, 1972, is a Greek self-taught vegan street artist who goes by the name LeFou, which means "the crazy" in French. Born in Greece, raised in Paris and currently living in Los Angeles, he had the chance to experience and become influenced by different cultures and major artistic works.

After discovering the living conditions of animals in factory farms, his theme has become mixing famous icons with vegan messages through pop art. One can see his passion for animals and justice through the direct messages of his work. His mission is showing viewers the current problems of the world, and how by making a small change, such as going vegan, one can help not only the injustices towards animals but also the environment (drought, methane, ...), world hunger and most of all his or her health.
