

AFFIDAVIT (SWORN STATEMENT) OF DAVID M. SCHMIT'S EVOLUTION DIET FED CAT AND THE 20 + HEALTHY, HUMAN YEARS OF HIS CAT ON EVOLUTION DIET

I, David M. Schmit, the affiant do solemnly swear that the following statements in this document are true.

1. I live at 5025 Morgan Ave., So., Minneapolis, MN, 55419.
2. I was not paid in any way to make this statement and I will not make any money for making this statement.
3. Evolution Diet is the best pet food I have ever used and I have used several other premium pet foods before I used Evolution Diet.
4. My cat, Rambo, was on Evolution Diet since 1992. Rambo lived in great health for almost 21 human years. Rambo was a black male domestic short hair cat. Veterinarians have told me that this type of cat lives to about 15 human years of age without severe health problems. Rambo was in excellent health until the last 2 months of his life. He was born on Jan. 1st, 1986. I had Rambo on Evolution Diet Pet Food since 1992. Rambo did not get any additional supplements in her diet, although I occasionally added some raw fresh vegetables and fruit to her Evolution Diet. He acted and looked like a cat that was about ten years old up until the last two to four months of his life.
5. Again, Rambo still acted like a cat that was about five to ten years old up until he was almost 21 human years old. Rambo died on Sept. 29, 2006.
6. I was taking my cat to the same Veterinary Clinic for the past six to seven years. The veterinarians were struck by the great health and vitality of Rambo on Evolution Diet up until he died. Rambo was one of the oldest cats they had seen in such good health. The vets at the clinic have told me that it is exceptional to see this type of cat in such good health at the age Rambo lived to without arthritis, kidney, heart and liver disease. Again, the veterinarians at the clinic told me that most cats of Rambo's breed usually die at about the age 15 human years.

The affiant, David M. Schmit, has nothing more to say regarding Rambo.
