

Jill Howe's Affidavit (Sworn Statement) Regarding Her EVOLUTION DIET Fed Cats that are now 20+ & 9+ Healthy Human Years

I, Jill Howe, the affiant do solemnly swear that the statements in this document are true.

1. I live at 623 Kilkenny Drive, Utica, NY, 13502. My phone number is 315-790-2265.
2. I have used several other brands of premium pet foods, but I have found Evolution Diet to be the best pet food I have ever used. I get the longest and healthiest life with my pets on Evolution Diet with the least veterinary costs.
3. I have not and will not receive any payment for making the statements in this document.
4. I have two cats that have been on EVOLUTION DIET for over half a decade. Tigger is a big male Orange Tabby Cat that is almost 21 Human Years old. Tigger was an overweight rescue cat that I adopted. After putting him on Evolution Diet his weight normalized and his general health improved. Tigger is in excellent health, but he does have diabetes. My vet is surprised at how well Tigger is doing on Evolution Diet. My vet told me that large cats with diabetes usually die much earlier than normal health cats and that a normal cat like Tigger usually only lives to about 14-15 years of age when they are in normal good health without diabetes. Tigger acts and looks like a cat that is 5-10 years younger than his actual age.
5. Mary Lou is a female Black & White Domestic Short Hair Female cat that is now almost 10 Human Years old. Again, both these cats are in exceptionally good health. Mary Lou, my female Domestic Short Hair Black and White Cat was born in 1997. Again, she has been on Evolution Diet Pet Food since she was born.

The affiant has nothing else to say.
