Mary Brown Affidavit (Sworn Statement) About How EVOLUTION DIET & Supplements Stopped a Fast Growing Tumor 9 Years Ago in her Dog "Benny" that is alive and well at 11 Human Years

- I. Mary Lois Brown, the affiant do solemnly swear that the following statements in this document are true.
- 1. I am an oil painter artist and have done so since my teen years. I am 63 years of and I live with my husband and my 2 11 year old dogs. "Benny" is a Rottweiller mix and "Sunny" is a female Labrador Retriever Mix with short Beagle legs. We live at 619 Apache County Rd. 3144, Show Low, AZ, 85901
- 2. Evolution Diet is absolutely the best pet food I have ever used and I am certain that Evolution Diet & Supplements saved my Dog's life.
- 3. My Dog, Benny, has been on Evolution Diet since 1998. Benny is in great health and is now 11 human years of age. He is a Brown and Black Short Hair Rottweller Dog that weighs 65 lb. When Benny was about 2.5 years old, he was diagnosed with a rapidly growing tumor on his back right leg. I had part of the tumor removed by Dr. Bone, DVM at Southwestern Veterinary Clinic in Phoenix, AZ. Dr. Bone was unable to remove the entire fast growing tumor and suggested that Benny should have his leg amputated. I wanted to save his leg and his life, so I used a Holistic Procedure, including Evolution Diet together with a high dose supplement compound that I made up. All the following amounts are based on 10 lb of body weight. Every 2 weeks, I made up a 2 week batch & multiplied the doses times the actual weight of the dog divided by ten. I kept the batch in the freezer and took some out every day. Vitamin C - 1000 mg/10 lb/d; B-Complex 100 - 1/4 cap/10 lb/d; E 400 3/4 cap/10 lb/d; Co Q 10 30 mg 1/3 cap/10 lb/d; Garlic 500 mg, 1/4 cap/10 lb./day; Flax Oil 1/4 teaspoon/10 lb/d; Zinc 50 mg/1/10 cap/10 lb/d; Noni 500 mg 1/4 cap/10 lb/d; Plant Enzymes 1/2 cap /1d; Acidophilus-Bifidus 8 Billion/ 2 caps/d; Flax Seed Oil 200 mg/d; Arganine 500 mg 1/2 cap/10 lb/d; Taurine 500 mg. 1/2 cap/10/d; L Carnitine 500 mg. 1/2 cap/10 lb/d; Silimaryn x 300 -1/2 cap/10 lb/d; Selenium 200 mcg 1/8 cap/10 lb/day; Dandielion 500 mg - 1/8 cap/10 lb/d. I mixed fresh squeezed carrot-broccoli juice mixed with his Evolution Pet Food. I fed him 2 times per day. I kept him on this regime for about 1 year. I have kept him on the Evolution Diet and some human vitamins, supplements, fresh fruit and veggies. The tumor has never returned. Lam sure that the food and supplements have prevented the tumor or cancer from ever returning. Benny is in perfect shape. He is full of life and vary frisky. He looks and acts like he is half of his age.
- 4. To help dogs live longest, brush teeth 2-3 times per week with non-fluoride toothpaste, give a daily dose of human adult vitamins and fresh veggies and fruit mixed with Evolution Diet. After the 1st of vaccines, use the 3 year Rabies vaccine only if legally required.
