Sworn Case Study Statement of Patricia Knudsen regarding Honey's, her Long-haired Dachshund mix, Aggressive Lip Tumor that was rapidly reversed by Dr. Eric Weisman's Cancer Supplement

I swear to the truth of the following statements:

- 1. My name is Patricia Knudsen. My address is 153 Division Street, Keyport, New Jersey 07735
- 2. I have lived here for 12 years.
- 3. I have been an administrative assistant for most of my life having worked for Goldman Sachs & Co. and PricewaterhouseCoopers LLP in New York City, the United States Geological Survey in Menlo Park and the Naval Postgraduate School in Monterey, California where I grew up.
- 4. I had direct phone contact with Dr. Eric Weisman after receiving a diagnosis of a large tumor from my veterinarian, Dr. Beverly Drozd, Home Veterinary Service in Belford, New Jersey.
- 5. Honey's tumor had grown rapidly over a couple of months. She panted a lot, with frequent coughing.
- Dr. Weisman had previously identified himself as a Holistic Practitioner and Scientist with a Dr. of Health Sciences
  Degree. He told me he was not an M.D. or Veterinary Doctor or Chiropractor. He explained that his information
  was not veterinary or medical.
- 7. Dr. Weisman was very clear that he was not offering a cure, treatment diagnosis or prevention for disease. He said the FDA had not evaluated his procedures or statements.
- 8. He said he wouldn't tell me what to do, but would offer information about Honey's condition.
- I TOLD DR. WEISMAN HONEY HAD BEEN DISGNOSED WITH A TUMOR. HE SUGGESTED a BIOPSY, WHICH I CHOSE NOT TO DO. HE ASKED FOR HONEY'S MEDICAL RECORDS, WHICH I SENT. HE WALKED ME THROUGH PERFORMING SOME PHYSICAL TESTS ON HONEY WHICH I DID.
  - He suggested I keep up with Honey's conventional veterinarian to monitor her tumor, which I did. He charged for the original written Program for Honey, but no extra fees for her follow up reviews. Dr. Weisman consulted with me many times about her condition/treatment, always answering questions with patience and kindness.
- 10. Honey was on Evolution Gourmet Fondue, Cheese Flavor. Before starting on Evolution food, she had developed a large tumor on her lip. She was on Dr. Eric Weisman's cancer procedures. Her coat got very shiny, her energy was back and her tumor shrank substantially in only 3 weeks ... absolutely amazing results in this 14 year old long-haired dachshund mix.
- 11. HONEY IMPROVED DRAMATICALLY IN ONLY A FEW WEEKS. I AM CERTAIN THAT ERIC WEISMAN'S PROCEDURES CAUSED HONEY'S LARGE LIP TUMOR TO SHRINK.
- 12. Honey's tumor shrank so much overall and especially at the point of attachment to her lip. I was worried it may catch on something so I did wind up having it removed by my veterinarian as a precaution. At this point, it had shrunk dramatically. The reason for the removal was to avoid injury to her.
- 13. Dr. Weisman told me which vitamins, botanicals, protein isolates, minerals and enzymes he used for other dogs with the same condition. He gave me explicit information for administering them. He followed up with me frequently to see how Honey was progressing.
- 14. He told me it would be a good idea to seek follow up with my veterinarian in case Honey needed antibiotics or other medication which only a veterinarian could provide.
- 15. I BELIEVE DR. ERIC WEISMAN CAUSED THE REVERSAL OF HONEY'S TUMOR AND LENGTHENED HER LIFE WITH FREE FOLLOW UP CONSULTATIONS, ASKING FOR NO EXTRA MONEY.

16. DR. ERIC WEISMAN IS ONE OF THE MOST COMPETENT, DEDICATED, KIND AND KNOWLEDGEABLE HEALTH,
PROFESSIONALS I HAVE EVER KNOWN AND DEALT WITH.

The Affiant has nothing further to say regarding this issue.
