

PRODUCT INTRODUCTION

Evergreen Tool has a lot to celebrate this summer. Along with moving into our new facilities in Peshtigo Wisconsin, we are introducing some problem solving solutions to your penetration seal headaches.

When faced with a thicker walled CaptiveAire hood, use the new Evergreen 5/8" tube - 3/8" pipe compression seal part number 1141. The extra length will be perfect for this application.

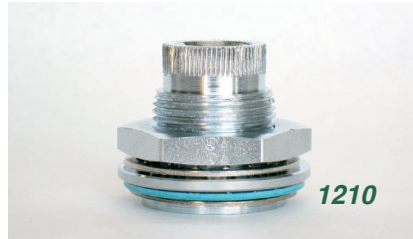

Installing an industrial dry chemical fire suppression system in a paint spray booth can be a daunting task. The new Evergreen extra-long Quik-Seals will make piping much easier.

P/N	X	Y
213	5.00"	2.00"
172	4.75"	2.00"
171	4.50"	1.80"
170	4.50"	1.80"

As our line of Blind Fittings - installed from one side of the hood - gain momentum, the need for a 1/2" Quik-Seal has been requested by multiple hood manufacturers and OEM's.

When you are in need of any of these products, please feel free to contact us for additional information. If you ever find your way through northeastern Wisconsin, please stop by for a tour of our new factory and offices.

Thank you for your continued support.
