

EVERGREEN TOOL CO., INC.

Technical Specifications

**DRILLMATE Pipe-Vac
Vac-Pad / Vac-Pad with Shortened Leg and Brace**

Product Description:

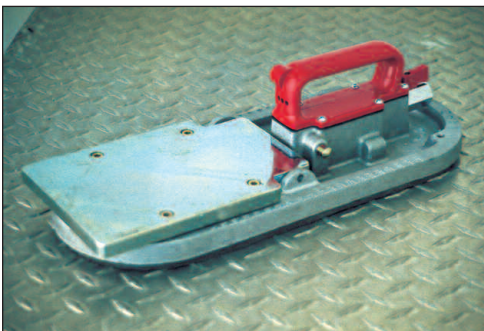

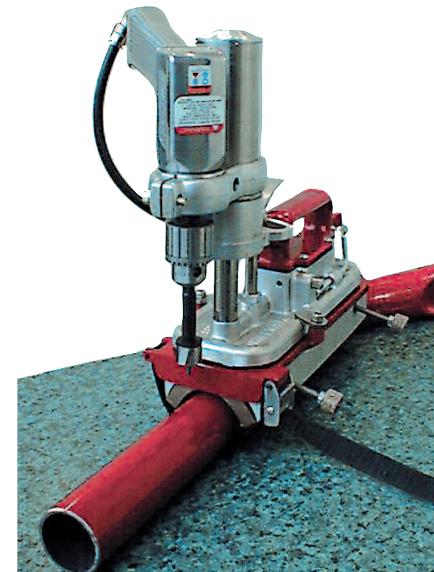

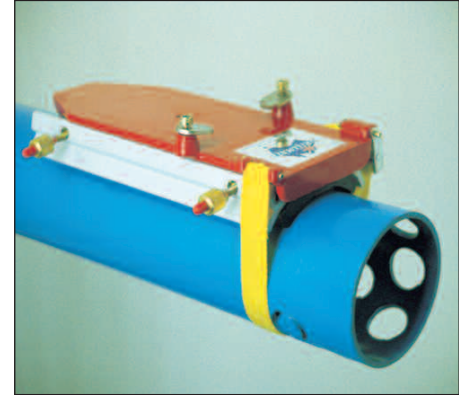

Drillmate Pipe-Vac is specifically designed to assist in drilling precise and consistent holes in pipe and tube. The vacuum based tool works in conjunction with the VAC-FORCE 2000 portable drill press or most magnetic drill presses to securely adhere to pipe down to 2" diameter. Drill holes in ferrous or non-ferrous metals, PVC pipe and other round objects. The lightweight Pipe-Vac requires only 100 to 120 psi of compressed air to firmly hold to the pipe and tube. For diameters under 6 inch use the additional strap.

Drillmate Vac-Pad

The Vac-Pad uses 65 to 120 psi of clean shop air to allow a magnetic drill to be used on wood, aluminum, stainless steel plastic or diamond plate or rough materials with imperfections up to 3mm deep. The Vac-Pad offers 761 lbf (suction) of holding power at 85 kpa. It can be quickly moved along the material surface by either pressing the vacuum trigger or closing the attached air flow fitting. The lightweight Vac-Pad weighs only 12 lbs.

Drillmate Vac-Pad with Shortened Leg and Brace

The Vac-Pad with Shortened Leg and Brace offer the suction ability of the Vac-Pad with the flexibility of the Drillmate. The lightweight tool (12 lbs.) can replace heavier magnetic drill presses in many instances. The shortened leg and brace gives you a total of 10.5 inches of travel.

Part No.	Description
1032	Pipe Vac PV2000
1042	VAC-FORCE w/drill feed stop
1114	Vac-Pad with shortened leg and brace
1113	VAC-Pad With Steel Plate
