WHITESIDE MACHINE COMPANY

About the Company

Whiteside Machine Company was founded in 1970 as a general purpose machine shop in the basement of Bill & Bobbie Whiteside's home. Located in western North Carolina near the furniture manufacturing town of Hickory, the company was often involved in making repairs or special parts for the furniture and woodworking industry. A strong commitment to customer problem-solving, a can-do attitude, and innovative ideas, along with a growing core of dedicated employees, helped the business evolve into a manufacturer of woodworking equipment and tooling.

Primarily through repeat business and referrals, the tooling business continued to grow to meet a demand for quality production router bits as well as custom application tooling. Today, Whiteside Machine occupies a 40,000 sq. ft. manufacturing facility and produces a complete line of solid carbide and carbide tipped router bits. Whiteside's quality, innovation, and customer commitment is still present in our superb product line, in the design of custom tooling to fill special customer requirements, and in the development of special machinery and tooling for our own manufacturing use.

As always, Whiteside Machine is continuously striving to improve our product through new technology, improved production techniques, and ongoing research and development efforts; along with rigid quality control, vital customer feedback and extensive field testing.

About Ordering

Whiteside Machine Company sells through a nationwide distributor network. Prospective customers should order from their local distributor. Call Whiteside Machine at 1-800-225-3982 for a distributor in your area.

Product Guarantee

All Whiteside tools are warranted to be free from defects in workmanship and materials. Warranty is limited to the cost of repair or replacement of the tool. Warranty is void if tools are altered in any way or show signs of abuse or misuse.

Safety Guidelines

BE CAREFUL. Always wear eye and ear protection. Wear dust masks. Avoid loose clothing. Keep hands, body, clothing and hair away from cutter. Do not remove safety guards. Always feed against the cutter rotation. Never use dull or damaged cutters. Disconnect power when changing bits or making adjustments. Always disconnect power when not in use. Follow all safety recommendations of the power tool manufacturer.

Whiteside Machine Company assumes no responsibility for defects, damage or injury (direct or indirect) caused by misuse, abuse, alteration or modification of any product (including sharpening).

Router, Drilling, & Boring Bits

- Family Owned and Operated
- Committed to Quality
 - Industrial Grade
 - Superb Product Line

ULTIMATE FLUSH TRIM BITS

The compression design provides the ultimate cut when using templates. These bits leave a crisp, clean edge on both the top and bottom edge of the workpiece.

(2+2 Compression)

(A) FLUSH TRIM (B) PLUNGE / PATTERN (C) COMBINATION

Part #	Shank Dia.	Cutting Dia.	Cutting Length	Overall Length
(A) UDF9112	1/2"	7/8"	1-1/8"	3-3/4"

(C) UDC9112	1/2"	7/8"	1-1/8"	3-3/4"

FLUSH TRIM SPIRAL BITS

These spiral bits offer state-of-the-art results in flush trimming. Our 1/4" diameter tools are great for small inside corners. Try our 1/8" diameter for extremely sharp corners. The 1/8" bit uses a solid pilot. All others feature a double ball bearing guide. Available in your choice of Up Cut, Down Cut, or an Up/Down Combination.

Up Cut

Part #	Shank Dia.	Cutting Dia.	Cutting Length	Overall Length

UDFT5152	1/2"	1/2"	1-1/2"	4-1/4"

ULTIMATE COMPRESSION BITS

CNC Sheet Goods Up / Down Bits

The "ULTIMATE" Carbide Compression Spiral Bit for CNC routing of sheet goods such as plywood and MDF.

Part #	Shank Dia.	Cutting Dia.	Cutting Length	Overall Length
UC5050	1/2"	3/8"	1/2"	3"
UC5075	1/2"	3/8"	3/4"	3"

Conventional Compression Bits typically force the chips into the mid-section of the cut where the up-cut and down-cut flutes overlap. These chips can pack into the flutes which make the bit hard to push and causes it to run much hotter. This results in lower feed rates and shorter tool life.

PART # UC5050

ADVANTAGES of the "ULTIMATE" Bit

- Dedicated cut length to match the material thickness.
- Up-cut flute extends into shank to improve chip evacuation.
- Ultimate chip control allows the bit to cut more freely, run cooler, and last longer.
- The down-shear flute cuts a 45° chamfer. Position the depth to barely shave the top edge of the material or lower the bit to cut up to a 1/16" chamfer.
- 3/8" cutting diameter bits are optimal for routing sheet goods. They remove less material with lower horsepower than 1/2" cutting diameter bits.
- 1/2" shank diameter provides the best rigidity and eliminates the need for odd sized collets.

O-FLUTE SPIRALS

Plastic Cutting

Standard O-Flute Spiral Bits designed for most plastic and aluminum applications.

Note - Order SC90 for flat bottom plunge point.
SC90V & SC91V are supplied with a vee plunge point.

SCREW SLOT BITS

Use these solid carbide bits with a plunge router to cut slots for #8 screws. Screw slots allow for the seasonal movement of larger wooden parts such as table tops. These bits will also cut up to a 7/16" deep recess for the screw head.

CNC ROUTER BITS

Straight Cut

PART # C7525F

CNC tools are designed to meet the severe applications of CNC routing. These tools offer superior performance over standard straight flute bits at the high feed rates commonly found on CNC routers. They also provide an economical alternative to the more expensive spiral bits. For the ultimate in CNC routing, choose from Whiteside's wide selection of Solid Carbide Spiral Bits listed on pages 2-4.

Use on CNC Routers only.

B3 Bearing supplied

BB501 - Bearing kit with wrench (see pg. 35). Increase the versatility of your Rabbeting Bits by simply changing the bearing size to vary your cutting depth. This set allows 1/4", 5/16", 3/8", & 7/16" cutting depth on all 1-1/4" bits or 3/8", 7/16", 1/2", & 9/16" cutting depth on all 1-1/2" bits.

BISCUIT JOINING KIT

Part #	Description
1940	1/4" Shank Kit
1945	1/2" Shank Kit

This kit contains our 5/32" Rabbeting Bit with 1/2" B3 bearing for cutting slots to fit #20 Biscuits. Also includes alternate bearings B14 and B15 to cut slots for #0 and #10 Biscuits. Hex Wrench included.

MULTI RABBET SET

Change your Rabbet depth by changing the bearing! Set includes all eight bearings to make each of the cuts shown. Hex Wrench included.

Wood blocks are not to scale.

Part #	Large Dia.	Cutting Length	Description
1952	1-3/8"	1/2"	1/4" Shank Set
1955	1-3/8"	1/2"	1/2" Shank Set

Sets are organized and protected in a plastic case.

DEEP MULTI RABBET SET

Our largest Rabbet Bit in a set with five bearings. Makes those extra deep Rabbet cuts as shown. Hex Wrench included.

Wood blocks are not to scale.

Part #	Large Dia.	Cutting Length	Description
1960	1-7/8"	1"	1/2" Shank Set

Sets are organized and protected in a plastic case.

2016		1-1/2"	3-3/4"	1-7/8"

Bearing: Use B2 for Beading
Use B4 for 2013 thru 2016

Use B3 for Roundover

ROUND OVER BITS

Small Pilot

Extra small brass pilot (5/32" dia.) allows these bits to roundover edges on finely detailed workpieces with intricate contours, tight confines, and narrow openings. These bits give professional results without all the tedious hand sanding. Carbide cutting edges far outlast comparable high speed steel bits.

Part #	Radius	Large Dia.	Cutting Length	Overall Length
1/4" SHANK				
1978	1/16"	3/8"	7/16"	2"
1980	1/8"	3/8"	7/16"	2"
1982	1/4"	5/8"	1/2"	2-1/8"
1984	3/8"	7/8"	5/8"	2-1/4"

MULTI-BEADING SETS

For Extra Deep Beading

Roundover and More! Conventional Beading only cuts a shallow 1/16" bead. Expand your capabilities with these versatile sets. Deeper beads create a more pronounced edge on larger pieces. Includes all four bearings and Hex Key Wrench. *Wood blocks are not to scale.*

Part #	Radius	Large Dia.	Cutting Length	Overall Length
1/2" SHANK

LAMINATE FLUSH TRIMMERS - WITH

Here's a Square Deal! A quality Whiteside Trim Bit with the exclusive Euro Square Bearing. How does it work? The square bearing stops spinning as soon as it touches the workpiece. Then, the side of the square simply slides along the workpiece edge. Compare this to a regular bearing that rolls along the edge - building up more glue and residue with every revolution. Plus, the square is made from non-stick Teflon®, so it wipes clean easily, and it won't mark your workpiece. If you cut laminates, you need to try this bit.

Part #	Cutting Dia.	Cutting Length	Overall Length	Bearing Number
1/4" SHANK				
2640	1/2"	1/4"	1-5/8"	B3SQ
2650	3/4"	5/8"	2-1/4"	B8SQ
1/2" SHANK				
2660	3/4"	5/8"	2-1/4"	B8SQ

These bits are designed with a slight taper on the cutting diameter. This allows up or down adjustment to achieve an exact blend - even after resharpening.

Replace the standard 1/2" B3 bearing found on most of our Edge Form bits with the **B3SQ** square bearing if residue build-up on the bearing or marring of the workpiece is a problem.

Recommended for solid surface applications. **B3SQ** is a 1/2" square. **B8SQ** is a 3/4" square. Both are standard 3/16" inside diameter.

ROUND OVER

* Dado clean out bits. Use to square the bottom of dado cuts made on a table saw.

*** Whiteside recommends using bits over 3/4" diameter in 1/2" shank whenever possible due to the fragile nature of the B19 bearing.

3390	1/2"	5/16" - 1-1/4"	1-3/8"	5/16"	3-1/4"

Bearing Number: B4

MULTI SIDE BITS

A great way to join up many multi-side projects (planters, columns, barrels, etc.). Very straightforward, this joint requires routing a notch in only one edge of each stave (side). Notching also improves ease of assembly and total glue area. All bits are 1/2" shank and designed for use in a router table with a fence guide.

FLUSH

PART #3506

RIBBED

Part #	Number of Sides	Stock (Maximum)	Large Dia.
1/2" SHANK			
3506	6 or 12	7/8"	1-7/8"
3508	8	7/8"	1-3/4"
3516	16	1"	1-5/8"

APPLICATION:

On six and eight sided objects, the exterior side is cut face up on a router table. Twelve and sixteen sided objects are cut face down. The same bit (#3506) is used for six sided and twelve sided objects.

Either Flush or Ribbed (outside corners protruding) construction is possible. Ribbed construction is recommended with 12 and 16 sides because the interior leg of the notch will be very small when made flush. Outside corners on ribbed construction can be cut or sanded down for flush appearance if desired.

Location of the inside corner of the notch (i.e.- vertical bit adjustment) is important for final finish appearance. The outside leg of the notch (closest to the exterior) should be the same length as the stock thickness for flush construction. This will put the inside corner of the notch in the center of the stave on six sided flush projects. The inside corner will be below center (farthest from exterior side) on all others. Allow extra stock to experiment and set corner height as desired. Move notch towards exterior side (raise the bit) to increase rib size (amount of outside corner protruding). Move notch away from exterior side (lower the bit) to decrease amount of rib. Note: Bit adjustment is reversed on twelve and sixteen sides since those staves are cut face down.

EDGE BANDING SET

Part #	Shank Dia.	Cutting Dia.	Cutting Length	Overall Length
3400	1/2"	1-1/2"	+ 3/4"	2-3/4"

3608	3/16"	3/8"	1-1/8"	1/2"	2-1/4"

Small Grooving Bits are commonly used for decorative designs in cabinet doors or for detail veining in furniture. Round Nose Bits (pg. 10) and V-Groove Bits (pg. 11) are often used in the same manner. The larger Grooving Bits are great for a raised panel effect in doors and for adding a bold accent to furniture or large work pieces. These bits also make nice edge profiles with the aid of a router table and fence.

CLASSICAL ROUND BOTTOM

1/2" SHANK				
3780	13/64"	1-3/8"	9/16"	2-1/2"

These bits are ideal for adding bearings to the shank for following templates. Select a bearing from page 35 with the same inside diameter as your shank size. Outside diameter should be the same size or larger than the large diameter of your router bit. Secure bearings with a lock collar. Use Lock Collar #LC-1/4 for 1/4" shanks or #LC-1/2 for 1/2" shanks.

The tooling on this page is designed to give the illusion of raised panel door construction in MDF and solid panel doors. When used individually these bits produce a nice, simple raised panel effect in one pass. Or use one of the "Panel" bits in conjunction with one of the "Stile" bits to create a more authentic raised panel reveal. Many different combinations are possible. See bottom of page.

Although designed for production routing on solid door machines and CNC routers, the addition of a bearing to the shank will allow the hobbyist to cut his pattern by following an edge guide. The guide can be four strips clamped around the perimeter of the door. The top strip may be curved for an arched pattern. Follow the guide and rout both profiles. There's no need to move the guide for the second cut. A larger bearing on the panel bit takes care of the offset. Use Bearing #B16 for the Stile bits and Bearing #B24 for the Panel bits. Secure the bearings to the shank with a #LC-1/2 Lock Collar (see pg. 35). When making the second cut, match the depth setting of the first cut to obtain a pattern with a flat bottom — Or vary the depth to add an extra distinctive "step" in the bottom of your reveal. Complete the door by adding a door edge pattern (see pg. 30) around the outside edge.

"STILE" PROFILE BITS

5725	Ogee	1-1/2"	2-1/2"

STILE & PANEL COMBINATION PROFILES

APPLICATION: RAISED PANEL DOOR CONSTRUCTION

Choose stock size as appropriate for your project. For example, 3/4" x 2" stile & rails and 5/8" thick panels (without optional back cut) are common for cabinet doors. Use your stock size and door size to calculate the following:

Stile length = Door height

Rail length = Door width - width of both stiles + Interlock

Panel height = Door height - width of both rails + Interlock - Expansion

Panel width = Rail length - Expansion

Interlock = 3/4" (3/8" per side) on Whiteside full size Stile & Rail bits

Expansion: Generally 1/8" on cabinet doors. Can vary with door size, green condition of wood, anticipated exposure to high humidity, and species of wood. The Stile bit cuts the entire length of the inside edge on both the stiles and the rails. The Rail bit is used to make the matching cross grain end cuts on the rails only. The Raised Panel bit cuts all four sides of each raised panel face down on the router table. Set Raised Panel bit height for proper tongue thickness. Tongue should be 1/4" for the full size Stile & Rail bits. Allow extra stock if you plan to use the optional back cutter. Use the Standard Glue Joint (page 23) or biscuits for added strength when gluing up larger panels. Cut all components and test fit. Then glue up and reassemble. Glue only the stile and rail joints. The panel should be allowed to "float" to allow for expansion and contraction. You may choose to use anti-rattle snakes to prevent the panel from rattling. Make your own by running a 1/8" bead of 100% silicone caulk on wax paper. Allow to dry. Cut into pieces about 3/4" long. Insert in each groove at every corner while assembling. Check the door for squareness immediately after gluing up. It may also be helpful to pre-stain the raised panel because part of the concealed portion of the tongue may become visible later due to contraction. Complete the door by adding a door edge pattern (page 30) around the outside edge.

SMALL RAISED PANEL OR RAISED PANEL BACK CUTTER

This bit offers a safe and economical way to make that optional backside cut on raised panels. It is suitable for use with any of our Stile & Rail bits on page 28. This bit can also be used as a shallow raised panel bit for smaller projects.

Part #	Shank Dia.	Large Dia.	Cutting Length	Overall Length
5850	1/2"	2-1/2"	1/2"	2-1/4"

SHAKER STYLE RAISED PANEL 15° Pattern

This set comes with three bearings (B3, B7, B8) to change the length of the tongue. Hex key included.

Part #	Shank Dia.	Cutting Dia.	Cutting Length	Overall Length
5980	1/2"	2"	9/16"	2-3/8"

SHAKER STILE & RAIL

These sets are for cabinet door construction with undersized 1/4" plywood panels (Actual panel thickness of 7/32" or 5.5 mm).

Part #	Pattern	Cutting Length	Large Dia.
1/2" SHANK			
5990	Shaker	13/16"	1-5/8"

PART # 6002A

FULL SIZE STILE & RAIL

PART # 6002B

MATCHED SETS

STILE RAIL

6001 - ROUND

6002 - OGEE

6003 - BEAD

Make full size Stile and Rail joints on your router table. The interlocking design plus the raised panel groove are both cut in one pass. Ball bearing guides control the cutting depth and also allow use on rounded, arched, or special shaped doors. With these two piece sets, simply switch router bits to change from cutting stiles to cutting rails. Ideal for stock from 5/8" to 7/8" thick.

Part #	Pattern	Reveal Width	Cutting Length	Large Dia.
1/2" SHANK				
6001	Round	1/4"	1"	1-5/8"
6002	Ogee	3/8"	7/8"	1-5/8"
6003	Bead	3/8"	7/8"	1-5/8"
6004	Straight	3/8"	7/8"	1-5/8"
6005	Traditional	3/8"	7/8"	1-5/8"
6006	Classical	3/8"	7/8"	1-5/8"

For Individual Bits:

Add A to Part Number for Stile Cutter.

Add B to Part Number for Rail Cutter.

Example: 6001A - Round Stile Cutter

Replacement Parts:

Groover - 6625

Bearing - B5

6006 - CLASSICAL

PLYWOOD PANEL STILE & RAIL CONVERSION KIT

This conversion kit is for cabinet door construction with undersized 1/4" plywood panels (Actual panel thickness of 7/32" or 5.5 mm). Whiteside's conversion kit #6000X converts the regular full size Stile and Rail bits to the narrower groove required for these plywood panels. This kit gives you the flexibility to do either plywood panels or raised panels. Plus, it can be used on any Whiteside full size Stile and Rail bits that you may already own.

Our most popular Stile and Rail sets are also available ready to use just for plywood panel construction. Order Part Number 6001X for round pattern or Part Number 6002X for ogee pattern. 1/2" shank only.

6001X SHOWN

APPLICATION: STILE & RAIL GLASS DOOR CONSTRUCTION

Make the Stile & Rail cuts for glass doors using Whiteside's full size Stile & Rail (above). No extra components are required. All that's needed is to stagger the cutting edges and "stack" both groovers on the Stile bit. Use both bearings (no groover) on the Rail bit. See photo. Now make your cuts just like in normal door construction. Cut the inside edges of all four pieces with the Stile bit. Trim the ends of the Rails with the Rail bit. Assemble door and insert glass pane. Use clips or corner trim mold on the back side to hold the pane in place.

MEDIUM RAISED PANEL BITS

Ball Bearing Guide

These bits cut a 1" wide pattern and are often used for general edge profiles in addition to raised panels. They can be used with any of the full size Stile and Rail bits shown on Page 28.

Part #	Pattern	Cutting Length	Large Dia.

6016	1-5/8"	15/16"	Reversible

DOOR EDGE BITS

Front Face Edge

These bits cut a decorative profile along the front face of the door edge while leaving most of the edge straight. Their shallow design works well with concealed European style cup hinges. Many of our other edge profile bits (pg 19-20) also make great door edges. (Deeper profiles may not be compatible with European style cup hinges).

Part #	Large Dia.	Cutting Length	Overall Length
1/4" SHANK			
3290	1-3/8"	3/8"	1-7/8"

DRAWER EDGE

DRAWER PULL - EUROPEAN STYLE

Part #	Large Radius	Large Dia.	Cutting Length	Overall Length
1/2" SHANK				
6024	3/16"	3/4"	7/8"	2-3/8"
6026	1/4"	1-1/2"	13/16"	2-3/8"

DRAWER EDGE FINGER PULL

Produces a nice smooth finger grip primarily used on the bottom edge of drawer fronts. Also used as a finger pull on cabinet doors where no edge pattern is needed on the front face.

Part #	Shank Dia.	Large Dia.	Cutting Length	Overall Length
6032	1/2"	1-1/4"	3/4"	2-1/2"

Bearing Number: B3

WINDOW SILL EDGE/FINGER PULL

Originally designed to cut the front edge of window sills, this bit has also become popular for making a rounded finger edge on both drawers and door edges. Use with a router fence or add a shank mounted bearing for following a straight edge or template.

Part #	Radius	Large Dia.	Cutting Length	Overall Length
1/2" SHANK				
6045	7/32"	1-1/4"	13/16"	2-7/8"
6046	3/8"	1-7/16"	1-1/8"	3-3/8"

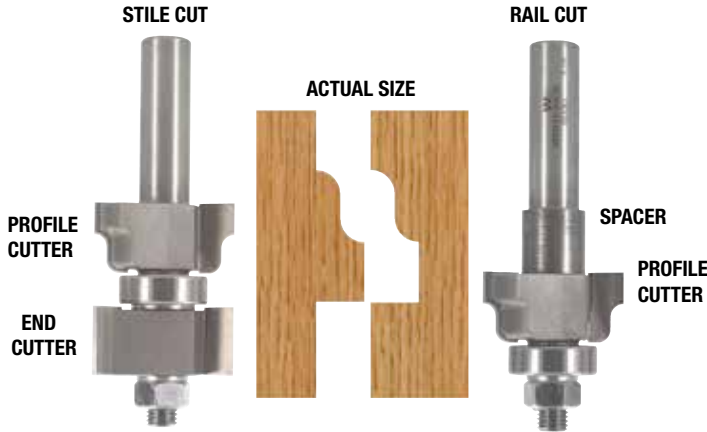

Use bearing (B16 for #6045, B18 for #6046) and Lock Collar (LC-1/2) on shank for template work.

WINDOW SASH

WINDOW SASH

This is the only bit you need to make a complete window sash. The bearing guide controls the pattern depth and also allows you to make arched or curved windows and glass doors.

Part #	Cutting Dia.	Cutting Length	Overall Length
1/2" SHANK			
6050	1-3/8"	7/8" - 1-5/8"	3-5/8"

Replacement Parts:
 Arbor: A380
 Bearing Number: B5

Profile Cutter: 6050H
 Straight Cutter: 6050G
 Spacer: 6050SP

APPLICATION:

This assembly with the straight end cutter cuts the inside edges on both the stiles and rails. Convert the assembly to make the mating end cut by exchanging the straight cutter for the spacer (see drawing above). The spacer can be installed between the profile cutter and the shank if additional reach across the work piece is needed. Now make the mating end cuts on the rails. This bit can also be used to cut both the decorative edges and the mating end cuts required to make your own window mullions (crosspieces).

SLOTING CUTTERS

SLOTING CUTTERS

1-7/8" Cutting Diameter - 5/16" Bore

DOVETAIL SETS

INCRA® DOVETAIL SETS

PART # D101

PART #605

Top quality Dovetailing sets for use with the popular Incra System. Choose the #D101 set (1/4" shank) for the smaller Dovetails (1/4", 3/8", 1/2", 17/32"). Take the #605 set (1/2" shank) for the heavier 3/8", 1/2", 5/8", & 3/4" Dovetail bits. Both sets also include the 1/4" and 3/8" Box Joint bits.

Part #	Description
D101	6 Piece Incra Set - 1/4" shank
605	6 Piece Incra Set - 1/2" shank

All bits available individually. See previous page.

LEIGH® DOVETAIL SETS

PART # D108

PART # D116

Upgrade to Whiteside Quality bits for your Leigh Jig. The smaller bits are supplied in the recommended 8mm shanks (1/2" Adapter Collet is included). The largest sizes come in 1/2" shanks. Improved performance guaranteed.

Part #	Description
D108	7 Piece Leigh set. Includes D8-437x8, D8-687, D14-51x8, D18-50x8, 1020x8, 1067, and 6400x8 Adapter Collet.
D116	6 Piece Leigh set for #D1600 16" Jig. All bits 8mm-shank. 6400x8 Adapter Collet to 1/2" is included. Complete with the following bits: 1020x8, D8-375x8, D8-500x8, D14-51x8, D18-50x8.

All bits available individually. See previous page.

SOLID BRASS INLAY KITS

Whiteside's Brass Inlay Kits allow you to make perfect fitting inlays for decoration or repairs. Simply cut your template from 1/4" thick material and trace it with your router to cut both the cavity in your workpiece and the matching inlay to be inserted. Instructions are included. Our kit includes a special centering pin to insure exact alignment with router spindle. Each kit includes a Solid Carbide Down-Cut Spiral router bit.

Part #	Cutting Dia.	Bit Part #	Inside Corner Radius	Description
9500	1/8"	RD1600	1/16"	Standard Inlay Kit
9501	1/4"	RD2075	1/8"	Large Inlay Kit

9510 - BASE PLATE REDUCERS - SOLID BRASS

These solid brass inserts fit into your router base plate to reduce the gap around the router bit. Not only is this safer, but it also reduces tear-out and helps support smaller work pieces. Supplied in a set with openings of 1/4", 3/8", 1/2", 5/8", 3/4", 7/8", and 1", plus a retaining nut. Openings are slightly oversize for tool clearance. Fits any router with a standard 1-3/16" diameter recessed hole for template guides.

BRASS TEMPLATE GUIDE BUSHINGS

Machined guide bushings allow precise centering of the bit inside of jigs and templates. Supplied with bushing and line up pin.

Part #	ID	OD
9540-38N	9/32"	3/8"
9540-44N	11/32"	7/16"
9540-62N	17/32"	5/8"

9600 - SQUARE CORNER CHISEL

Use this tool to square up the round corners left behind when routing hinge mortises. Hold unit in mortise corner and strike with hammer. Our chisel features a sharp 3/8" square hardened steel cutting blade. Manufactured by Whiteside Machine Company.

9750 - EXTENSION ADAPTER

For CNC Carving Machines

PART #9750

Used for light routing and veining on CNC carving machines. Allows deeper reach. Adapter is 1/2" shank. Accepts 1/4" shank bits only. Order Part #9750.

BRASS SET-UP GAUGE BLOCKS

Our Square Gauge Blocks are a quick way to make many easy, accurate set-ups. A great way to make exact depth movements on plunge routers. On table routers, they're perfect for setting distances from the fence to the cutter, or for checking the bit height above the table. Supplied in 1/8", 3/16", 1/4", 3/8", and 1/2" squares. Blocks can be "stacked" to cover a wider range of sizes. A very helpful tool!

Part #	Description
9800	5 pc. Set - 2-1/2" Long
9810	5 pc. Set - 4" Long

ARBORS

PART #A200

Part #	Shank Dia.	Arbor Dia.	Arbor Length	Overall Length
A200	1/4"	5/16"	7/8"	2-3/8"

PART # B7

PART # B17

ACCESSORY KITS

BB501 - 5 PIECE BEARING CONVERSION KIT

Use this kit to vary the horizontal cutting depth of router bits with bearing pilots. Great for stepping in to finish depth by controlled increments.

Contains B2 (3/8" x 3/16"), B3 (1/2" x 3/16"), B7 (5/8" x 3/16"), B8 (3/4" x 3/16") Bearings and 3/32" Hex Key Wrench.

BB600 - GENERAL BEARING REPAIR KIT

This handy kit includes spare bearings, screws, and wrench to replace bearings on most bits.

Includes five B3 (1/2" x 3/16") and two B2 (3/8" x 3/16") bearings, ten 54025S Screws, and a 3/32" Hex Key Wrench.

BB701 - ACCESSORY KIT

Great for replacement bearings and screws - Plus this generous bearing assortment allows you to vary your cutting depths and change your profiles. Also contains lock collars and bearings for adding bearing guides to the shanks of your standard bits for following templates.

Contains: 12 bearings — four B3 (1/2" x 3/16"), one each of B2 (3/8" x 3/16"), B7 (5/8" x 3/16"), B8 (3/4" x 3/16"), B9 (1/2" x 1/4"), B6 (5/8" x 1/4"), B4 (3/4" x 1/4"), B5 (7/8" x 5/16") and B11 (1-1/8" x 1/2"); two each 1/4" lock collars (LC-1/4) and 1/2" lock collars (LC-1/2); one each 1/16", 5/64", 3/32" and 5/32" Hex Key wrenches; plus ten 54025S bearing screws.

BEARING LOCK COLLARS

Retaining Collars used when bearings are added to the shanks of router bits for following templates.

Part #	Shank Dia.	Outside Dia.
LC-1/4	1/4"	7/16"
LC-1/2	1/2"	11/16"

Uses part #HK-1/16 Hex Key Wrench
#LCS-Replacement Set Screw for Standard Lock Collars

SPARE PARTS

SOCKET HEAD CAP SCREWS - 10 pc. Pack

Part #	Thread Size	Thread Length	Hex Key
34825S	3-48	1/4"	5/64"
54025S	5-40	1/4"	3/32"
103238S	10-32	3/8"	5/32"

Add BLK to part number for 100 pcs.

HEX KEY WRENCHES

Part #	Size	Application
HK-1/16	1/16"	Standard Bearing Lock Collars
HK-5/64	5/64"	1/8" I.D. Bearings (3-48 Screw)
HK-3/32	3/32"	3/16" I.D. Bearings (5-40 Screw - Most Common)
HK-5/32	5/32"	1/4" I.D. Bearings (10-32 Screw)
HK-1/8	1/8"	Hole Saws / Quick Change Shanks

HEX NUTS - 10 pc. Pack

Part #	Thread Size	Width	Hex Size
1032N	10-32	1/4"	3/8"
31224N	5/16"-24	1/4"	1/2"

Replacement Parts By Tool Number

Replacement Bearing sizes are listed in the catalog with each tool. Most tools with bearing pilots require only the 54025S Screw. Exceptions:

Part #	Type	Fits Part Number
34825S	Screw	2400, 2401, 2404A
103238S	Screw	2013-2016, 2410, 2415, 2560, 2570, 2575, 2580, 2715, 2900-2902, 3390, UDC9112, UDFT9112, UDP9112
1032N	Nut	RFT5125, RFTD5125, RFT5200, RFTD5200, UDFT5152

Router Bit Sets

Durable Plastic Cases!

Keep Your Tools Safe and Organized.

ROUNDROVER & BEADING SETS

SET 501 - 1/2" SHANK

ROUNDROVER 4 PCS B2 BEARINGS EXTRA SPARE SCREW BEADING

2006 1/4" RADIUS 2008 3/8" RADIUS 2009 1/2" RADIUS 2010 3/4" RADIUS

Roundovers are by far the most used edge forming bits in woodworking. This set offers the most common radii (R1/4", R3/8", R1/2") in 1/2" shanks, plus a hefty 3/4" radius workhorse. Extra bearings and wrench are included to convert each bit from Rounding over to Beading - i.e., Roundover with a decorative step.

SET 502 - 1/4" SHANK

ROUNDROVER 5 PCS B2 BEARINGS EXTRA SPARE SCREW BEADING

2000C 1/8" RADIUS 2000 3/16" RADIUS 2001 1/4" RADIUS 2003 3/8" RADIUS 2004 1/2" RADIUS

Easily round off all your square edges with lightweight 1/4" capacity Hand Routers. Keep the whole range of sizes (R1/8", R3/16", R1/4", R3/8", R1/2") neatly organized and right at your fingertips. As with the 1/2" shank set, this kit comes fully equipped to extend its usage by converting to Beading - i.e., Roundover with a decorative step.

BASIC 7 PC. BIT SET

These sets are made up of the most popular woodworking bits.

Includes:

- R3/8" Cove
- 3/8" x 1/2" Rabbet
- R3/8" Roundover
- 45° Chamfer
- 1/4" Straight
- 1/2" Straight
- 1/2" Flush Trim

SET 401
1/2" SHANK

SET 402
1/4" SHANK

1804	1801
1901	1900
2008	2003
2305	2302
1058	1013
1067	1026
2405	2402

STRAIGHT & HALF ROUND COMBO

SET 600 - 1/2" SHANK

A nice collection of Straight Bits and Half Rounds grouped together in one protective case. This set includes:

- 3/8 Straight
- 1/2 Straight
- 5/8 Straight
- 3/4 Straight
- 3/8 Half Round
- 1/2 Half Round
- 5/8 Half Round
- 3/4 Half Round

This handy group covers the full assortment of bits needed for the INCRA® HingeCrafter. Whiteside Industrial Quality.

ROUTER BIT SETS

Whiteside Machine

PLYWOOD DADO SET - 470

PART #SC218

PART #1065A

PART #1083A

These router bits are sized to exactly match today's nominal plywood thicknesses. Consists of a 7/32" bit for 1/4" Plywood, a 31/64" bit for 1/2" Plywood, and a 23/32" bit for 3/4" Plywood. Included:

- SC218 - Solid Carbide Straight Bit
- 1065A - Carbide Tipped Straight Bit
- 1083A - Carbide Tipped Straight Bit

1/2" SHANK - Two Flute

CNC SETS

BALL NOSE SET #703

1/4" Shank Sets
Perfect for 2D and 3D Carving

#703 Ball Nose Set group contains three 1/4" shank bits consisting of two Ball Nose Spirals and one Conical Ball Nose Spiral. Great for most CNC profiling.

#705 Starter Set is a great asset for small CNC owners who are just learning how to use their machine. Even experienced CNC machinists will appreciate the selection of bits in this set. This group contains five 1/4" bits including two Conical Ball Nose Spirals, an Up Cut Spiral, and two V-Groove bits.

STARTER SET #705

LETTER SET #706

Part #	Pcs	Description
703	3	Ball Nose Set - SC66, RU1800RN, RU2075RN
705	5	Starter Set - SC64, SC66, RU2075, 1502, 1550
706	6	Lettering Set - 1403, 1404, 1550, 1572, 2051, RU2075CN
708	8	Engraving Set - SC54, SC55, SC70, SC71, SC75, SC76, 1541, 1500

#706 Lettering Set group contains six bits including a Pointed Roundover, Plunge Roundover, 60° V-Groove, a Cove Nose Spiral, and two sizes of Round Nose Bits. Create a wide variety of letters, signs, and decorative artwork with these bits.

ENGRAVING SET #708

#708 Engraving Set contains eight 1/4" Engraving bits with an included angle ranging from 15° to 90°. All types of projects will appear visually stunning with the many engraving options that exist from this one kit.

TEN ESSENTIAL ROUTER BIT SET

The woodworking hobbyist needs a variety of quality bits. Whiteside's Set 410 is essential to kickstart your router projects. All bits are 1/2" shank except the 1/4" straight bit. This set contains:

- 1014 - 1/4" Straight
- 1069 - 1/2" Straight
- 1954 - 1/2" Rabbeting
- 2305 - 45 Degree Chamfer
- 2006 - 1/4" Radius Roundover
- 1804 - 3/8" Radius Cove
- 2407 - 1/2" x 1-1/2" Flush Trim
- RU4900 - 3/8" Solid Carbide Spiral Upcut
- 6710A - 1/4" 3-Wing Slot Cutter
- A210B - Slot Cutter Arbor
- D10-55 - 1/2" 10 Degree Dovetail
- B3, B7, & B8 Bearings, and a 3/32" Hex Key

SET 410

WHITESIDE HINGE BORING BIT

This Hinge Boring bit features a centering point and two carbide spurs to eliminate tear-out. This 35mm cutting diameter bit is designed specifically for European style cabinet door hinges. Manufactured by Whiteside Machine Company.

PART #6140

Part #	Shank Dia.	Cutting Dia.	Overall Length
6140	3/8"	35mm	2-3/8"

** Use only in drill press or boring machine. NOT for use in routers.

FACE FRAME COUNTERBORES Carbide Tipped

PART #FF301

Part #	Counterbore Dia.	Pilot Dia.	Length	Type
FF301	3/8"	0.136"	4"	Standard
FF301SP	3/8"	0.136"	4"	Spiral Flute
FF302	3/8"	0.136"	6"	Long
FF303	Replacement 0.136" Pilot Fishtail Drill Bit (HSS)			
FF304	Replacement Set Screw - Uses 5/64" Hex Key			

Standard Type fits Unique, Norfield, Evans, Ritter, and Marcon face frame boring machines.
Long Version is for use on drill press.

Four Flute Adjustable COUNTERSINKS

WhiteSide's 82° Countersink Heads are designed to slip over the drill bit and affix with dual set screws into the flutes. Adjust the drilling length by sliding the head up or down the bit. Use to countersink holes in wood, plastic, or aluminum for flat head screws. Upgrade to the High Speed Steel series for longer life, especially in fiberglass or other abrasive materials. Matching drill bits are offered below for your convenience.

Standard Carbon Steel

8070014	#14	1/4"	1/2"	5/8"

DRILLS For Countersinks

These drill bits are the appropriate size for the WhiteSide Adjustable Countersinks. Choose standard Jobber Drills for best economy. The optional Taper Point Drills are ideal for better control on entry and exit. The Taper Point resists the rapid pull-in tendency of gelcoat and other hard, thin materials. They also break through less abruptly, which helps reduce blowout on exit.

Jobber Drills

Part #	Dia.	Decimal	Screw Size
8061094	7/64"	0.1094"	#4

3-WING WOOD DRILLS

6" OAL / Carbide Tipped / 1/2" Shank

Bores clean accurate holes in wood, plastic laminates, Formica®, and Masonite®. Carbide tipped for long life even in abrasive materials. The outside spurs outline the hole and help prevent fraying, chipping, and blowout. The replaceable 1/8" diameter high speed steel center point starts the hole and prevents the bit from walking. Replace the center point with a 1/8" drill bit if desired. Can be re-sharpened or re-tipped.

- Optional 1/8" Machine Drill Center Point is Part # 8061240

3-WING COMPOSITE DRILLS

3-7/8" OAL / Carbide Tipped / Quick Change Shank

These 3-Wing Carbide Tipped Drills are designed for extended life in fiberglass and other composites. The 7/16" hex shank provides a no-slip grip when used with a standard three jaw chuck. This shank design also makes switching to a different size so simple when used with our Quick Change Chucks. Accurate centering is ensured by the replaceable 1/8" high speed steel center point. Bits perform equally well in handheld electric or pneumatic drills as well as boring machines and drill presses. Can be re-sharpened or re-tipped.

COMPOSITE DRILLS - With Pilot Drill 3-7/8" OAL / Carbide Tipped / Quick Change Shank

These drills have all the attributes of the 803 series but with a larger 1/4" diameter center hole as requested by several industrial users. This bit is supplied with a 1/4" Taper Point Drill bit that allows better control when trying to make a gentle entry. These bits can also be used with the 1/4" Pilot Rod (supplied) in applications that follow a 1/4" pre-drilled guide hole. This series has proven to be very effective in soft, gummy materials such as King Starboard®. Can be re-sharpened or re-tipped.

Note:

- Each 809 Series Drill is supplied with a 1/4" Tapered Point Drill bit, a 1/4" Pilot Rod, and a 3/32" Hex Key Wrench

QUICK CHANGE TOOLING

Whiteside's Quick Change Tooling was designed for the production environment to allow a quick and easy switch from one tool size to the next. The 7/16" hex design is larger and stronger than most. This design allows the use of larger drill bits and hole saws with our Quick Change Chucks. (Our hex shank tooling will also work great in standard three jaw chucks). The Chucks are provided with a 1/2" hex shank for most applications or with a 3/8" hex shank for use in drills with only a 3/8" capacity. The Quick Change 1/4" Hex Adapter is available so that any 1/4" hex shank bits or drivers can also be used in the main chuck. This system really makes changing tools a snap.

Quick Change Chucks

Part #	Shank Dia.	Adapter Size	Overall Length

SELF CLEAN™ HOLE SAW - Carbide Tipped

U.S. Patent # 7,189,036

The Self Clean™ Hole Saw brings about a new generation of hole saws. Marine manufacturers were consulted in their development. The tool saws faster than conventional hole saws plus saves additional time because the plug falls out of the tool when the cut is finished. Made from high grade steel, carbide tipped, and produced specifically for cutting fiberglass. The quick change system further increases productivity when moving from one hole size to another. Can be re-sharpened or re-tipped.

#800K Kit Includes

- 2" Quick Change Shank - #800/QCS
- 1/4" Pilot Rod - #8070000
- 1/4" Tapered Point Drill - #8070250
- 1/8" Allen Wrench - #HK-1/8

Notes:

- Hole Saws are typically sold as a kit.
- To order a Hole Saw without the kit, remove the "K" suffix from the Part #.
- Additional Sizes are available by custom order.

DEEP-COR™ HOLE SAW - Carbide Tipped

Deep-Cor™ Hole Saws feature a 3" depth of cut (twice the depth of standard hole saws). The Deep-Cor™ is the ideal tool to use when drilling through thick materials such as transoms for "thru-hull" exhaust holes or bulkheads. These saws also boast a "trim tooth" that trims the plug generated by the saws and allows for easy extraction. They feature long lasting carbide tips and premium steel bodies. Unlike traditional hole saws, Deep-Cor™ is constructed with a fluted body and a slotted wall which allows the saw to expel chips more efficiently than standard saws. The long plug generated by boring completely through the transom will typically fall out without assistance, saving boat builders time and money. Can be re-sharpened or re-tipped.

Notes:

- Hole Saws are typically sold as a kit.
- To order a Hole Saw without the kit, remove the "K" suffix from the Part #.
- Additional Sizes are available by custom order.

- 2" Quick Change Shank - #800/QCS
- 1/4" X 6" OAL Drill Bit - #8060256
- 1/8" Allen Wrench - #HK-1/8

QUICK CHANGE SHANK

Quick Change Shanks can be used with the Self Clean™ (800 Series) or the Deep-Cor™ Hole Saws (808 Series). The standard 2" length is supplied with each kit. Longer lengths are available for extra reach. These shanks are compatible with the Quick Change Chucks on page 41.

800-3/QCS	7/16" Hex	3"
800-4/QCS	7/16" Hex	4"
800-6/QCS	7/16" Hex	6"

TRANSOM DRILL - 8" OAL / Quick Change Shank

In conjunction with the marine industry, the Transom Drill was developed to eliminate the problems associated with drilling through fiberglass and wood. Due to the special parabolic flute design, chip packing problems are eliminated and make short work of drilling through thick transoms. Micro-grain carbide tips and premium steel bodies ensure maximum performance and durability. This bit is ideal to drill mounting holes for outdrive gimbals brackets, outboard engine brackets, and drain holes. Can be re-sharpened or re-tipped.

TRANSOM DRILL - 5" OAL / Quick Change Shank

A shorter, more compact version of the 8" Transom Drill. The carbide tipped vee point offers the toughest and most durable drill point. The flute design facilitates easy chip evacuation. This drill will go through thick composites in half the time and last up to 20 times longer than high speed jobber drills. Can be re-sharpened or re-tipped.

BRAD POINT TRANSOM DRILL - 5" OAL / Quick Change Shank

These self-centering Transom Drills have several design attributes that save time and money. Designed to make clean, accurate cuts in gelcoat with minimal chipping & "blowout". Features a "climbing flute" for easy chip evacuation (self-cleaning, no pecking). The center point produces no "walking" during entry. Can be re-sharpened or re-tipped.

For METAL CLAD DOORS

Traditional downcut spiral door bits on the market "BLOW OUT" material on the bottom side of the door after the bit dulls. Whiteside's Compression Door-Lite bit continues to perform after dulling because the material is "pulled" up instead of being pushed down. They are made of high grade Tool Steel and precision ground on state of the art CNC grinders.

Test Results

Tests were conducted of the Whiteside Machine Up/Down Door-Lite Bit against traditional spiral door bits. Test cuts were performed on a CNC door cutting machine routing steel clad exterior doors. The traditional bit cut an average of 12,000 inches per bit, whereas the Whiteside Door-Lite bit cut an amazing 22,000 inches!
