—LEGAL—

The contents of this book rely on data published by the United States Government and its various agencies and departments, including but not limited to the General Land Office–Bureau of Land Management, the Department of the Interior, and the U.S. Census Bureau. The author has relied on said government agencies or re-sellers of its data, but makes no guarantee of the data's accuracy or of its representation herein, neither in its text nor maps. Said maps have been proportioned and scaled in a manner reflecting the author's primary goal—to make patentee names readable. This book will assist in the discovery of possible relationships between people, places, locales, rivers, streams, cemeteries, etc., but "proving" those relationships or exact geographic locations of any of the elements contained in the maps will require the use of other source material, which could include, but not be limited to: land patents, surveys, the patentees' applications, professionally drawn road-maps, etc.

Neither the author nor publisher makes any claim that the contents herein represent a complete or accurate record of the data it presents and disclaims any liability for reader's use of the book's contents. Many circumstances exist where human, computer, or data delivery errors could cause records to have been missed or to be inaccurately represented herein. Neither the author nor publisher shall assume any liability whatsoever for errors, inaccuracies, omissions or other inconsistencies herein.

No part of this book may be reproduced, stored, or transmitted by any means (electronic, mechanical, photocopying, recording, or otherwise, as applicable) without the prior written permission of the publisher.

# Extra! Extra! (about our Indexes)

We purposefully do not have an all-name index in the back of this volume so that our readers do not miss one of the best uses of this book: finding misspelled names among more specialized indexes.

Without repeating the text of our “How-to” chapter, we have nonetheless tried to assist our more anxious researchers by delivering a short-cut to the two county-wide Surname Indexes, the second of which will lead you to all-name indexes for each Congressional Township mapped in this volume :

- Surname Index** (whole county, with number of parcels mapped) .....page 18
- Surname Index** (township by township) .....just following

*For your convenience, the “How To Use this Book” Chart on page 2 is repeated on the reverse of this page.*

We should be releasing new titles every week for the foreseeable future. We urge you to write, fax, call, or email us any time for a current list of titles. Of course, our web-page will always have the most current information about current and upcoming books.
