Yamaha YVC-330 Portable USB & Bluetooth Conference Phone

Featuring NEW SoundCap Technology!

The YVC-330 USB & Bluetooth speakerphone solves the problem of finding vacant rooms for spontaneous meetings. The innovative SoundCap technology converts the audio of open workspaces into a clear and natural signal that is almost as good as being in a quiet meeting room. By focusing on participants around the table and eliminating background noise from noisy working environments it allows participants at the other end of the call to focus on the conversation. Don't be fooled by this portable conference phone's compact design: with Yamaha technology, great sound comes in small packages.
