A Letter From the Owner ... And Thank You!

Thank you so much for your purchase! Please read every word of this short QuickStart Guide because it will help you get incredible results from using this product - plus you will learn our exact recommendation for the best way to use your Phaiser Bluetooth Earbuds!

You might wonder ...

Why Phaiser?

In 2014, inspired by the idea of convenience, efficiency and wireless technology, Phaiser began designing and manufacturing Bluetooth products such as speakers headphones and now even Bluetooth earbuds. Our products were easily recognised by the market because of its stylish design and innovative features.

Our desire was to make the wireless music experience an incredible one ... and that's why I wrote this guide. In this QuickStart Guide, you will learn how to best use this product, the technology we put into it, and all the incredible features it has ... so that you will LOVE the experience of using it every day!

Connect With Us

We love to connect with fans of Phaiser. We would love it if you would join our special VIP Club to stay connected:

Why You're Going to Love Your BHS-430 Bluetooth Earbuds!

You've made a smart choice, and here's why.

You ordered the BHS-430 Headphones because you wanted a reliable wireless music experience without compromising on sound quality or comfort. You enjoy using the latest technology and premium workmanship. That is why BHS-430 is built with sturdy materials to last a LONG time ... and that's exactly what it's going to do for you. In short, you're going to LOVE the results when you wear your Phaiser headphones wherever you go.

Here Are 4 Great Things That Your Phaiser Bluetooth Earbuds Will Do For You!

"I absolutely LOVE this Headset." - DW

1. **The moment you first use your Phaiser BHS-430 Earbuds**, you will notice how easy it is to pair them with your mobile phone and how fast they connect. Unlike other run of the mill Bluetooth earbuds BHS-430 has been designed for simplicity and speed.
2. **The next thing you will notice is** the impressive sound. Most people say that the BHS-430 is equal or better than the overpriced models of the big corporations. We even partnered with Comply®, the leading manufacturer of noise isolating earphone tips, to provide you with only the best.
3. **When you take them out for the first run** you will finally be able to focus on your workout and never again have to adjust your headphones. The earhooks hold your buds in place almost unnoticeably and leave your hands totally free.
4. **Getting wet and sweaty is no longer a problem** as your earbuds are covered with an advanced nano-coating by Liquipel® protecting them from any water damage. We are 100% confident in this technology and provide you with a Lifetime Sweatproof Warranty on your buds.

Now that you understand the results you will experience and the technology that we are using ... I bet you'd like to know how to get the best possible results from your earbuds.

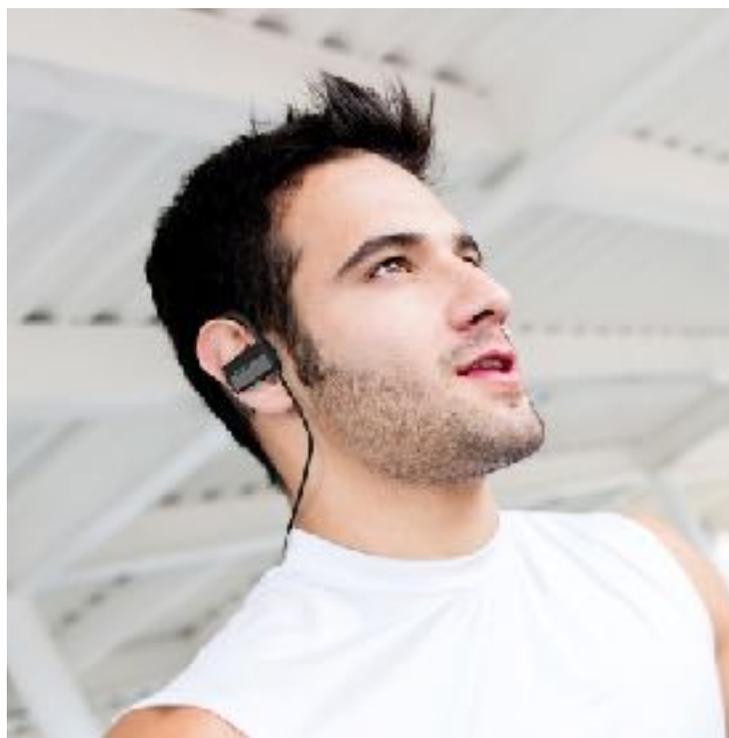

How to Get the Best Results When Using Your Phaiser BHS-430 Bluetooth Earbuds!

Here's how to get the best results using your new Phaiser BHS-430 Bluetooth Earbuds...

Q: How do I connect the Earbuds to my phone?

A: Turn the headset on by holding down the multifunction button on the outside of the right earphone. As soon as you hear the "Power On" message, go to the Bluetooth menu in your phone. Search for new Bluetooth devices and check if you see "BHS-430". Just connect to it. If your phone asks you to confirm anything, just click OK or Accept and you are good.

Q: How do I wear the Headset correctly?

A: Put the ear-hooks behind your ear and adjust the earbud to fit into your ear channel.

Q: How do I turn them up to full volume?

A: Make sure you turned up the volume to max on your phone. Now increase the volume on the earbuds by briefly pressing + on the right earbud. Please be sure not to press in quick succession (double click) as this is reserved for the "next track" function.

Q: How do I store my Earbuds correctly when not in use?

A: We strongly recommend storing your earbuds in the provided Phaiser carrying case when not in use. This ensures that they don't get damaged or lost.

Q: How can I connect 2 devices to this headset?

A: While the Headset is ON, no music is playing and no call is connected, press and hold the "+" button until you hear the "disconnected" notification. After that, connect the new device through its Bluetooth menu, then go to the Bluetooth menu of your original device and connect it again (if you like). Now both devices are connected and you can for example use your tablet to listen to music while not missing any calls from your phone.

Q: I experience low sound quality. What can I do about it?

A: Please change the earbuds to another size that fits you better. This has a huge impact on sound quality and bass. You may also use another size of FlexFit enlargements (big size installed) or remove it entirely to get a perfect fit. I strongly recommend you to also try the included Comply® memory foam tips (1 pair of size M included, installation instructions above). Personally I think the Comply® tips are best for sound quality and comfort. It's also possible to change the equaliser setting by pressing and holding + and - at the same time until hear a short beep (3 settings available).

Inserting the Comply™ Premium Earphone Tip

1. Squeeze down the foam tip and roll the tip into a thin, round cylinder.

2. Pull back and up on ear to open the canal. Gently insert the entire tip into the ear.

3. Hold the tip in place until it expands

Installing the Comply Earphone Replacement Tips

1. Remove the silicone tip from the earphone.
2. Clean the earphone nozzle of any debris with a dry cloth.
3. Insert the earphone sound port nozzle into the tip's core at an angle. Then push the rest of the tip onto the earphone's nozzle.
4. Repeat for the other side

Q: How far is the bluetooth range for this headset?

A: This depends a little. If there are obstacles between headset and phone, the range may be lower. With a clear line of sight you should get about 33 feet.

**Q: How do I charge the headset? How long does it take?
How do I know when the headset is done charging? Which
cable do I use to charge the headset?**

A: On the left earphone, you find the charge port cover marked with the USB symbol. Open it with your fingernail, pull it out and flip it a bit so you have space to plug in the USB charging cable. Check if the LED turns RED. Now the headset is charging. As soon as the LED turns GREEN, it is fully charged. This takes a maximum of 2,5h. Please use the included micro USB charging cable.

Q: Where is the indicator LED located?

A: The indicator LED is located on top of the right earphone. Please check below picture to see exactly where it is.

Q: Do I need to turn the headset off so it does not empty the battery?

A: You can turn it off by holding down the call button on the right earbud so it will stop using any battery. However, if you leave it on, it will still last you more than a full week in standby. It's actually not necessary to always turn it off and on as it will go to standby automatically after not using for a certain period.

Q: Can I mute the microphone while on a call?

A: Yes. While on a call, press the Volume - button until you hear a beep indicating the mic is on mute. Repeat this to take the mic off mute.

Unexpected difficulties? Bluetooth Issues found on some devices:

Unfortunately Bluetooth is not perfect and some devices are affected by certain issues. We make sure all of our models work perfectly with all Bluetooth devices, however, due to changes in operating systems and bugs in the Bluetooth software on certain devices, issues can still arise. This is caused by software problems on the phone side and not by the earbuds. These problems affect every brand of Bluetooth earbuds. I have listed the most common issues and their fixes in this section.

Issue 1: I cannot see the earbuds in my Bluetooth menu. How can I make them appear?

Solution 1: Please make sure the earbuds are ON and the blue LED is constantly ON. Sometimes it can happen that the earbuds are not immediately visible in the Bluetooth menu. To make them appear, simply turn off Bluetooth and turn it back on. On some devices it is sufficient just to leave the Bluetooth menu and enter it again.

Issue 2: I am getting an error message when trying to pair/connect the earbuds. How can I fix this?

Solution 2: Please try again. In case you still get the error, turn off Bluetooth on your phone and turn it back on before you try again. The earbuds are compatible and tested with every major phone, you may safely ignore this message in case it ever shows.

Issue 3: Music seems to be skipping even I am sure the earbuds are in range. How can I fix this?

Solution 3: There is a bug in the Bluetooth software of certain popular mobile phones. It can seem as if the earbuds are not in range. Playback will skip from time to time. I have seen it happen when music resumes after a call has ended. To fix this, pause playback for about 20 seconds, then resume and the skips will be gone. Alternatively, turn off the earbuds and turn them back on to reach the same result.

Issue 4: I connected the earbuds to my Windows computer, but I experience issues. What can I do?

Solution 4: Please go to the manufacturer website of your device. If your device is a notebook and Bluetooth is integrated, the notebook manufacturer's website is a good place to start. If you are using a Bluetooth dongle, try installing the software CD that came with it or search the manufacturer website for a driver matching your dongle. Often the Bluetooth software and drivers that Windows installs by default will not work properly. You may need a software such as Widcomm or Bluesoleil (usually provided by the manufacturer) to provide you with the full set of functionality.

Issue 5: I have problems connecting the device to my phone after they are already paired. How can I reset the list of paired devices on my headset and reconnect them?

Solution 5: Press the same button combination like we use to force the headset to pairing mode, but keep the buttons

pressed even you hear the first confirmation. After about 10 to 15 seconds, the headset will play another notification tone to tell you that all pairings have been deleted from the headset. Delete the entry from your phone's Bluetooth menu as well and restart the headset.
