PRODUCT FEATURES

1. Foldable for easy storage.
2. Premium Speakers with strong Bass and HD Stereo Music.
3. Extra long Playback and Standby time.
4. Easily operable buttons for answering phone calls and controlling audio playback.

SPECIFICATIONS

Bluetooth Specification: 4.2

Battery: Lithium Polymer Battery 3.7V

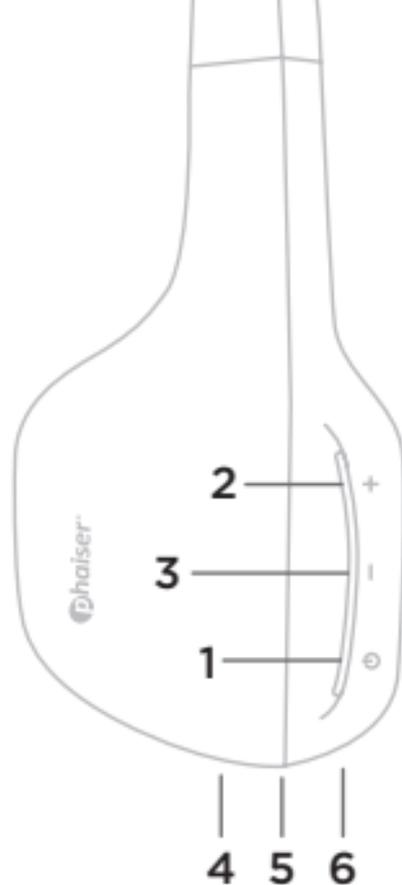

Standby Time: UP to 450 hours

Talk Time: UP to 11 hours

Music Playback Time: UP to 15 hours

Charging Time: Less than 2 hours

Operating Temperature: 14°F/-10°C to 140°F/60°C

- 1 Power Button
- 2 Plus Button
- 3 Minus Button
- 4 AUX Socket
- 5 Microphone
- 6 Indicator LED
- 7 Micro-USB Charging Port

FIRST STEPS

To ensure best battery performance, it is recommended to charge the headset fully before first use.

To do so, connect the USB charging cable to the charging port at the bottom of the left speaker.

CHARGING THE HEADSET

Just plug in the micro USB charging cable at the bottom of the left speaker. You can choose to either use a dedicated wall charger with a USB port (like a mobile phone charger), your computer's USB port or basically any powered USB port. Once you start charging the indicator-LED on the control unit will be constantly red. After charge is completed, the LED will turn blue.

Note regarding the functions described in this manual: Not all phones or other connected Bluetooth devices support every function. For further information, please refer to your device's user manual.

PAIRING

Before using the headset for the first time, you must pair it with another Bluetooth-enabled device (for example a phone). The headset will automatically enter pairing mode after you power it on and become visible to other devices.

1. Put the headphones on your head and press and hold the power button. You will hear the audio message "Power On". While the LED indicator is constantly blue, the headset is in pairing mode.
2. On your phone, find the Bluetooth menu and "search for" or "add" new

devices. Select “BHS-630” from the list and pair it.

3. Once the headset is successfully connected to your phone, you will hear the audio message “Connected”.

ADDITIONAL PAIRING NOTES

1. If asked for the Pass/PIN code, please enter “0000”. Newer phones don’t require this.
2. The headset will automatically turn off if not paired within 5 minutes.

MANUAL PAIRING, PAIRING WITH A SECOND DEVICE OR RE-PAIRING

1. Simultaneously press and hold the Power and Minus buttons for 3 seconds while the headset is turned on. You will hear the audio message “Disconnected” (The original connection will be lost while in pairing mode).

2. Search the Bluetooth menu of your device for “BHS-630” and complete above regular pairing steps until successfully connected.
3. To delete all pairings from the headset, press and hold the Plus, Minus and Power buttons for 10 seconds until you hear the low tone confirmation.

MULTIPOINT

This headset is capable of connecting with 2 devices at the same time, enabling you to use the headset with both devices simultaneously.

A common application, for example, is to connect your phone and your tablet-pc. You will be able to enjoy media on your tablet-pc while not missing phone calls from your phone.

1. Pair the headset with the first device according to the instructions under “Pairing” (Turn the headset

on and select “BHS-630” in the Bluetooth menu). This device will be the secondary device.

2. Pair the headset with the primary device according to the instructions under “manual pairing” (press and hold Power and Minus for 3 seconds). This device will be the primary device where all functions for the multifunction („power“) button work by default.
3. Once you paired and connected the primary device, go back to the secondary device and connect the headset again through the device’s Bluetooth menu. You will hear the voice confirmation “Connected”.

Additionally, you can use the manual pairing method when you already have 2 devices connected to the headset and like to connect the headset to a third, different device instead.

Of course, you can reconnect one of the 2 previously connected devices

again through its Bluetooth menu to use Multipoint functions again.

AUTO RECONNECT

1. If you turn the headset off, it will be disconnected from your phone. It will automatically attempt to reconnect once turned back on and in range.
2. A secondary device may need to be reconnected through the Bluetooth-menu by selecting "BHS-630".

OUT OF RANGE

1. If headset and phone are separated by more than 10 meters (33 feet), they will disconnect.
2. In case the headset and phone do not automatically reconnect once back in range, briefly press the Power button to manually reconnect. You can also use manual

reconnect to abort pairing mode and connect to the last connected device.

3. While you are in multi connection mode, a device which goes out of range, will lose connection. The headset will keep trying to connect to the lost device for 5 minutes.
4. In case you intentionally switched off the Bluetooth function on a single connected device and hear the “Disconnected” message, you can immediately go to the Bluetooth menu of your other device (phone or tablet) to connect the headset by using the regular pairing steps described earlier. The headset will become visible to other devices as soon as all connections are dropped or it's forced to pairing mode by pressing and holding the Power and Minus buttons at the same time for 3 seconds.

ON / OFF-FUNCTION

Hold the Power button for 2 seconds to turn the headset on. You will hear the audio message “Power On”. You will see the indicator LED turn blue for a short time, then turn off if automatically reconnected to your phone or stay blue while in pairing mode.

To turn off the headset, hold the Power button for 2 seconds. You will hear the “Power Off” message. The indicator LED will turn red and then shut off.

If you leave your earbuds powered on without a device being connected, they will automatically power down after 5 minutes.

ANSWERING CALLS

As soon as you have an incoming phone call, the headset will notify you by ringtone and read the phone number of the caller to you.

To answer, briefly push the Power button or answer the call on your phone. The call will be transferred to your headset if not set differently in your phone.

REFUSING CALLS

To refuse a call, double press the call button and the call will be rejected. You will hear a confirmation tone.

ENDING CALLS

To end a call, press the call button briefly or end the call through your phone.

LAST NUMBER REDIAL

To redial the last number you called, triple click the call button and the phone will start dialling.

VOLUME CONTROL

By pressing Plus you can increase the volume and by pressing Minus you can decrease it. To adjust the volume quicker, the buttons can be pressed in quick succession.

Note regarding volume control

Warning: Listening to music on a high volume over a longer period of time may damage your hearing ability.

VOICE ASSISTANT AND VOICE DIALING

Double press the Power button to activate your phone's Voice Assistant function such as Siri or Google Now. It's necessary that your phone supports this feature and that it's turned on. Please refer to your phone's user manual for further information.

PLAY / PAUSE

During media playback you can press the Power button briefly to start, pause or resume playback. It is also possible to use your phone's media player to control this function. Sometimes, it's necessary to manually start a music player app before the headset controls start working.

NEXT / PREVIOUS TRACK

During media playback you can skip between tracks by holding Plus for the next track or Minus for the previous track.

EQUALIZER SETTINGS

In order to change the way the headset reproduces music from your device, press and hold the Plus and Minus buttons at the same time until you hear a short interruption in playback. This will change the equalizer setting. There are 3 equalizer settings available: “Normal” (default), “Bass” and “Treble”. Try them out to find the most suitable one for your preferred music style.

BATTERY STATUS NOTIFICATION

Every time you turn the headset on, you will hear the battery status notification. There are 3 battery levels reported:

High: 100% to 60% battery life

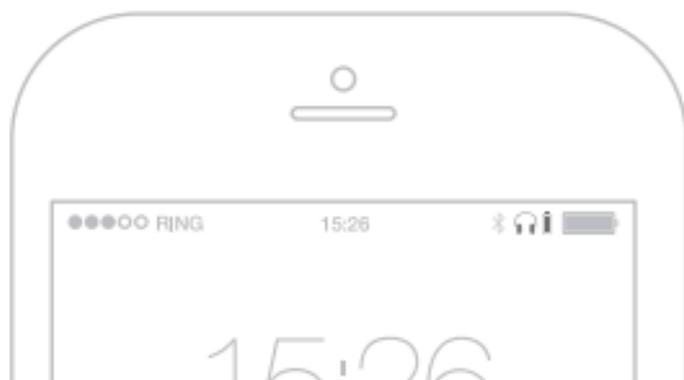

Medium: 59% to 30% battery life

High-low beep: 29% to 0% battery life

While the headset is turned on, you can trigger the battery status notification manually by briefly pressing the Plus and Minus buttons at the same time.

The headset will start to report low battery level automatically 5 to 10 minutes before automatic shutdown.

On iOS and some Android devices, you will be able to see the battery level of the headset in the status bar of your smartphone.

USING THE CHARGING CASE

The headphones can also be charged using the (optionally) included headphones charger. To do so, connect the headphones to the charger using the included USB cable and press the big silver button on the charger to turn it on.

A blue light indicates that the charger is turned on. If no headphones are connected, the charger will turn off after 20s. If the charger doesn't turn on it is empty and needs to be recharged.

To recharge the charger, simply connect it to your mobile phone's

charger. While it is charging, the LED indicator will flash red. As soon as it is charged, it will constantly light red. Charging the charger will take about 3h, depending on the USB power output.

Only applies to models which include the Charging Case.

MICROPHONE MUTE AND UNMUTE

While on a call, press and hold the Minus button for 1 second until you hear the notification tone to mute the microphone. Repeat to unmute.

TROUBLESHOOTING THE HEADSET

Issue: Headset does not work

Solution: Please make sure the headset is turned on and charged.

Issue: Phone disconnects from headset

Solution: Make sure the phone supports the Bluetooth Hands-Free Profile and is in range.

Issue: Headset does not work properly with the phone

Solution: Pair phone and headset again, make sure headset is in range (no obstacles like other electronic devices or walls).

Issue: Battery lasts shorter than expected

Solution: Turn down the volume. High volume will drain the battery faster than lower volume.

AVOIDING PROBLEMS

- Turn the headset off before putting it into a bag or pocket to avoid accidental calls.
- Do not clean the headset with solvents or abrasives.
- Do not expose the headset to extreme temperature (not outside 14°F/-10°C to 140°F/60°C).
- Do not expose the headset to fire, the battery may explode.
- Do not attempt to open the headset.
- Do not put heavy objects on your headset.
- For safe storage, keep the headset in a dry place.

- Avoid moisture and dust.
- Do not use the headset while swimming or showering.
- If stored longer than 1 month, please recharge the battery before use.

To safeguard against potential problems, make sure you've registered your 2-year manufacturer and lifetime sweatproof warranties at phaiser.com/extra.

ADDITIONAL INFORMATION

Radio Frequency Exposure

This headset is a radio transmitter and receiver. It communicates with Bluetooth equipped devices by receiving and transmitting radio frequency (RF) electromagnetic fields (microwaves) in the frequency range 2.4 to 2.4835 Ghz. The output power of the headset is only 0,001 watt (low). The headset is designed to comply with the RF exposure guidelines and limits set by national and international authorities and health agencies.

Potentially Explosive Atmosphere

If you enter a potentially explosive atmosphere, please make sure you turn off your headset. Such areas are rare and in most cases, but not always, clearly marked. It is unlikely but possible that your device could generate a spark and cause an explosion or fire resulting in serious injury or death.

Avoiding Hearing Damage

Serious and permanent hearing damage and even loss of hearing may occur if you use your headset continuously at high volume. Please be sure to set the volume to a safe level. Using high volume continuously may feel normal after some time but it can still damage your hearing ability. In case you experience ringing or mued speech, do not continue listening and have your hearing checked. The higher the volume the sooner your hearing may be affected. Hearing experts suggest that you protect your hearing. It is better to use the headset only for a limited time at high volume. It is not suggested to turn up the volume in noisy surroundings to block out the noise. In case you cannot hear people talking to you anymore, please turn down the volume.

Please refer to earlier pages of this manual on how to adjust the volume.

SAFETY INFORMATION

In some areas it is illegal and generally it is not recommended to use the headset for listening to music while operating a vehicle. You should be careful and attentive while driving. Do not continue using the headset if you find it distracts you while operating any kind of vehicle or during any other activity requiring your full attention.

CAUTION

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment causes harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF EXPOSURE

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This device should be installed and operated with minimum distance 0mm between the radiator & your body.
