

# How to Hang Your Wise Owl Outfitters SingleOwl or DoubleOwl Hammock

Please follow the instructions below to safely hang your hammock. Please be advised that all hammocks come with an inherent risk of injury. Please be very careful when setting up and enjoying your hammock.

1. Find two trees that are about 10-15 ft. apart and clear the area between them of any debris or sharp objects

2. Place your hammock on the ground between the two trees and then get your ropes out to prepare to tie them.

3. Tie both ends of both of your ropes in a double surgeons loop like this:

## Double Surgeon's Loop

**1.** Double the end of the rope and make a single overhand knot

**2.** Hold the left side (shown above) of the rope in your left hand and bring the loop around and insert through the overhand knot.

**3.** Hold the loop in your right hand and the other end in your left.

**4.** Pull tight, leaving enough space to put the other end through the loop once placed around tree.

# How to Hang Your Wise Owl Outfitters SingleOwl or DoubleOwl Hammock

4. Starting at one tree; wrap your rope around the tree and put one end of your rope through the loop on the other end and leave hanging. Repeat on other tree.

5. Clip carabiner that is attached to the end of the hammock onto the loop of the knot on each end of the ropes that are attached to the trees.

6. Carefully climb in your hammock and enjoy!

Tip: If your hammock is not tight enough and seems to be too close to the ground; you can either raise the ropes around the tree so they are at a higher level or you can tie another surgeons loop higher up on the rope and clip your carabiner to the higher loop. Once you have tied your knots after setting up your hammock for the first time, you can leave them tied and the next time you set up your hammock the knots will already be ready to go.
