Power Supplies & Wiring

DekPro™ EFFEX Power Supplies

DekPro™ EFFEX Transformer Kit

Sold in any quantity.

Kit includes 1 Outdoor DC output transformer w/ Quick Connect lead, 1 timer / photo cell, 1 dimmer with remote control, 1 - Y-splitter and 1 - 9' Quick Connect wire. Dimmer draws **2.5 watts**. Determine correct transformer size by adding up wattage of all fixtures. Total wattage should not exceed 80% of the capacity of the transformer. (100 watt transformer has two outputs).

- Item # DP36WTRANSKIT - 36 watt transformer kit
- Item # DP60WTRANSKIT - 60 watt transformer kit
- Item # DP100WTRANSKIT - 100 watt transformer kit

DekPro Quick Connect System

DekPro™ EFFEX Transformer

Sold in any quantity.

Outdoor DC output transformer provides power to LED lights. Comes with a Quick Connect output wire. Determine correct transformer size by adding up wattage of all fixtures. Total wattage should not exceed 80% of the capacity of the transformer. Measures 6-1/2"L x 2"W x 1-1/2"H.

- Item # DP36WTRANS - 36 watt
- Item # DP60WTRANS - 60 watt
- Item # DP100WTRANS - 100 watt (2 outputs)

DekPro Quick Connect System

DekPro™ EFFEX Dimmer

Sold in any quantity.

12 volt waterproof remote dimmer, controls on/off and dimming functions for EFFEX series lights and transformers. Requires separate transformer. Works with most DC transformers up to 100 watts. Draws **2.5 watts**. Remote range - Approx: 70 ft.

Item #: DPDIMMERWP

DekPro Quick Connect System

DekPro™ EFFEX Timer with Photo Eye

Sold in any quantity.

110 volt photoelectric timer with built in photo eye. Set to on/off at dusk and dawn automatically or on at dusk with 2 - 10 hour run times. Designed for use with any transformer and has two outputs. Plug into outlet and plug transformer into this unit.

Item #: DPTIMER

Power Supplies & Wiring

DekPro™ EFFEX Wiring

DekPro™ EFFEX 9' Quick Connect Cable

Sold in any quantity.

9' Cables come with water tight Quick Connect fittings on each end. Cables connect into DekPro™ EFFEX lighting components. Used when running wiring through top rail of aluminum railing system (i.e. DekPro™ Prestige)

Item # DP9CABLEMF

DekPro Quick Connect System

DekPro™ EFFEX In-Line Connector Cable

Sold in any quantity.

Used optionally, this 6' cable enables post caps to be wired by tapping into 12 Gauge EFFEX perimeter wire below the deck and transferring the power up the post and to the lighting fixture. Provides a watertight connection.

Item # DPPIGTAIL72 (Must use with EFFEX 12-2 wire)

Item #: LVW122100 - 100' - 12 gauge outdoor rated wire

Item #: LVW122250 - 250' - 12 gauge outdoor rated wire

DekPro Quick Connect System

DekPro™ EFFEX Y-Splitter

Sold in any quantity.

Y-splitter allows for branching off of circuit where needed and looping wires back into the transformer for larger projects.

Item # DPYSPLITTER

DekPro Quick Connect System

DekPro™ EFFEX Transformer Lead - Replacement

Sold in any quantity.

This replacement lead connects to the transformer or dimmer to begin wiring for the DekPro™ EFFEX system.

Item # DPTRANSLEAD

DekPro Quick Connect System

2.2w Band / 3.5w Down

D. Post Light
1 Watt

E. Louvered Light
1.5 Watts

E. Stair Light
1 Watt

Lighting Overview - Featuring DekPro™ Prestige Aluminum Railing

See illustration above as reference. Dashed lines are a representation of approximate wire locations, each installation will vary.

- Run wire from your transformer to the location of your first post.
Note: Do not plug in transformer until all wires are run.
- Run wire up inside the post to your first lighting fixture. Drill a minimum 1/2" hole through the deck board to allow passage of the wiring through the board and into the post.
Tip: Laying post on its side prior to attaching to deck will allow for easier installation of wire. Use a fish tape or equivalent to pull wire to the top of the post. Tape wire to the top of post.
- Once wire is installed into first post, stand the post upright and secure into place. (Plumb as necessary)
- From the first lighting fixture, run a 9' Quick Connect Cable into the post and through the top rail to the next light. Continue this method until all lights are connected. (Brackets and posts need to be drilled using a 3/8" drill bit to run wire)
Note: Wiring cannot be run through the top rail of stairs when using DekPro Prestige Railing.
For stairs, wiring should be run up & down inside the posts.
- Once lights are all connected, plug transformer into GFI protected 115V outlet and check to ensure all lights are illuminated, if any lights have not illuminated unplug transformer and check connections. Once all lights are working properly securely attach caps to the post.

All DekPro™ EFFEX Lighting Products are Non-Polarity Sensitive

Wiring Overview

Rail Wiring Overview

Quick Connect Wiring

Transformer

Run cable from the transformer up inside the first post to the post light (left) and connect via Quick Connect connections. From there, use a 9' Quick Connect cable to run through the top rail to the next post. Continue this process until all post caps are connected. (Brackets and posts will need to be drilled using a 3/8" drill bit to accommodate cable)

In-Line Connector (Optional)

Step 1

Unscrew In-line Connector Module.

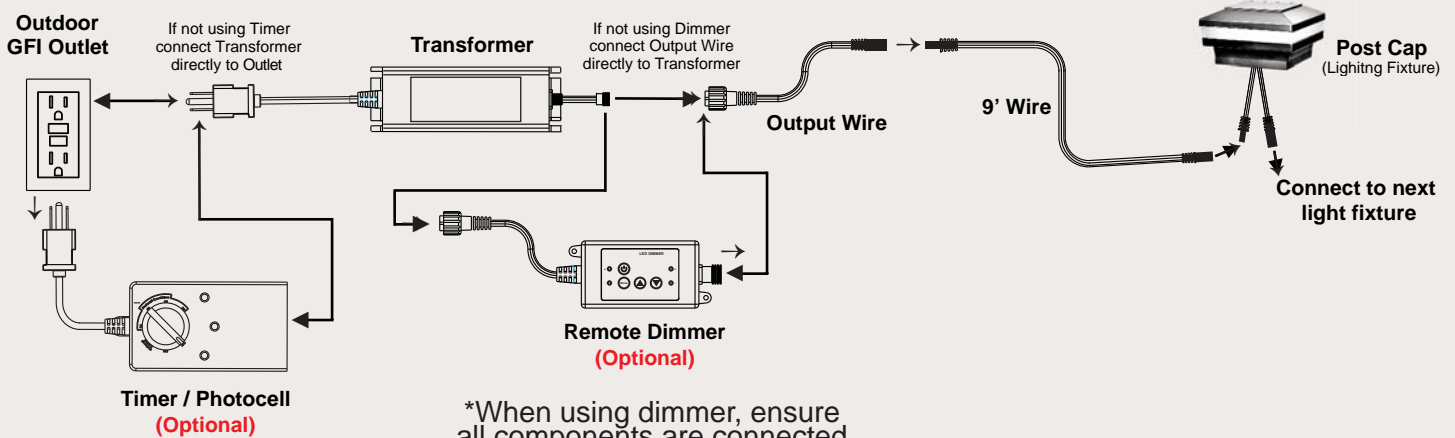

Step 2

Align In-line Connector with EFFEX 12-2 gauge perimeter wire.

Step 3

Screw In-line Connector together until wire is fully pierced and cap fully seated.

Power Supply Diagram

When using dimmer, ensure all components are connected before powering transformer
