TOOLS NEEDED

Level	Shovel
Concrete	9/16" Wrench
1/4" Allen Wrench	(Included)

1. The poles should be sunk to the depths shown on the illustration below. With concrete 1' below the end of the pole. The max recommended spacing is 42' apart. Ground Sleeves are optional. Concrete installation may vary upon soil condition.

2. Slip all collars and braces over the top of poles. Place caps on the tops of poles. Set collars and braces according to the height adjustment of the game you want to play.

3. Net Installation: Attach loop on one end of net cable to eyebolt. On other side attach the cable loop to hook on the reel and begin cranking until net is taught between posts. Use (4) bungee cords to secure sides of the net.

When using at 8' volleyball height the cable must first go through the pulley and then down to the reel.
