

APPLYING PAINT TO VERSACOURT TILE

1. Apply Bulldog primer to all areas that require paint. When applying Bulldog, ensure the Bulldog does not touch any of the existing paint on the court, it will cause peeling. If you must paint in the same area there is existing paint, cover the existing paint to avoid getting Bulldog primer on it.
2. Allow the Bulldog primer to dry for 30 minutes.
3. Pour paint in hardener can and mix well (6 parts paint, 1 part hardener). Do not mix the paint with the hardener until the Bulldog has dried and the area is completely prepped.
4. Apply the paint promptly! Do not let the paint sit for an extended period of time, it will start hardening and will become too thick to apply.
