Description: Distilled water, steam sterilized @ 121°C/15psi, endotoxin free <0.005EU/ml.

Storage: Store at room temperature.

Application: This product is ideally suited for nuclear transfer, transfection, transformation, cell and tissue culture, LAL testing, and all other aqueous solution preparation that require stringent quality control.

Properties: IBI Cell Culture Grade Water is tested for use in critical assays and applications. Water is endotoxin-free (to the maximum detection limit of <0.005EU/ml by turbidimetric assay). The purification process of our Cell Culture Grade Water includes distillation, continuous deionization, reverse osmosis, 0.1µm filtration, followed by steam sterilization in an autoclave.

Specification: IBI certifies that this product was inspected and that all inspection operations and testing have been complete, the product conforms to the specifications.

Result: Pass.
