# Branch Care Instructions

## Remove branches from the plastic packaging immediately

Keep branches away from direct sun light

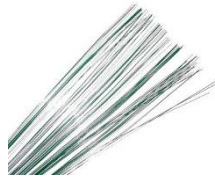

Keep branches below 60 degrees

If keeping them below 60 degrees is not possible store them at the lowest possible temperature and keep them moist by misting them or soaking them in cold water until you are ready to use them.

## Tools needed for assembling:

Wire Cutters and Wire: To attach branches to the metal arch.

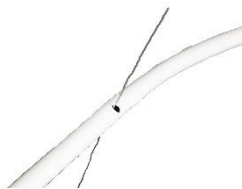

Pruners: For trimming branches

## Assembling your Arch

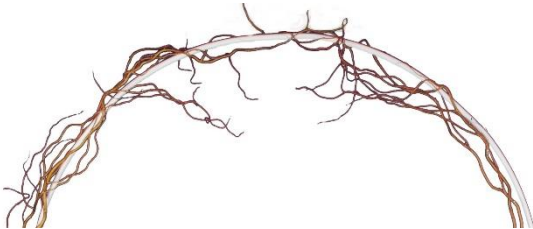

Assemble the metal arch by connecting the poles together.

Put a wire thru each hole at each connection: These will be used to attach the branches

Open the Curly Willow 5-foot branches. Using the wires tie two of the branches to the top of the metal arch so that the tips overlap each other, then attach the base of the branches.

Tip: Leave extra wire for tying on greenery, flowers...

After securing the top branches to metal arch, put the remaining branches in the vases and attach both the Curly Willow branches and the Birch poles to the metal arch, adjusting their appearance as necessary.

Your arch should look something like this after the branches have been attached:
