Allergen Statement – Prophylaxis Paste

Wonderful Dental's prophylaxis paste manufacturer makes prophylaxis pastes for numerous customers throughout the United States, Canada, Europe and South America. As such, they are cognizant to the potential issues that may arise in those patients with specific sensitivities to allergens.

As a result of this concern, our manufacturer has asked their supplier-base if they were operating in an environment free from certain allergen sources.

Based on supplier responses, our manufacturer believes that, to the best of their knowledge, the prophylaxis pastes currently manufactured for Wonderful Dental and all others pastes manufactured in their facility are free of the allergens listed below. Furthermore, the equipment used to process the raw material and finished goods does not come in contact with these allergens.

- Gluten
- Soybeans and Soy Products
- Milk and Milk Products
- Peanuts and Peanut Products
- Egg and Egg Products
- Wheat and Wheat Products
- Tree Nuts/Tree Nut Derivatives
- Fish and Fish Products
- Shellfish
- Although Wonderful is dye-free, most of their other pastes do contain FD&C dyes

Please feel free to contact Wonderful Dental directly if you have any specific questions or concerns.
