

# THE BEARDED MAN CO

## MOUSTACHE & BEARD STYLING WAX

**INSTRUCTIONS:** Scrape a small amount with the back of your thumbnail, rub between fingers to melt and warm first then apply in desired fashion to facial hair.

- **Ingredients:** Beeswax, Lanolin, Shea Butter, Essential Oils, Fragrance.
- Don't go overboard with our wax, it's powerful stuff! You can always add more to get your facial hair into shape.
- 100% natural, contains a blend of beeswax, oils and butters, no preservatives.
- Ensure tin lid is put on tightly to ensure an air-tight seal.
- Tested on men, not animals!
- **WARNING:** May cause sighs and swoons of envy from those around you, use with care.

# MOUSTACHE & BEARD STYLING WAX

You facial haired men demanded it, and we listened. Our new wax is now so popular we've had to get a bigger studio to make it in! Our moustache and beard wax is the perfect blend of oils, butters, and waxes to tame all manner of 'staches and unruly facial hair.

This conditioning wax will not only style but treat your beard and moustache as well. The smoothing balm makes it great for taming your facial hair, shaping those extravagant handlebars and adding definition for the well groomed modern gentleman.

Provides a sculptable precision that will style hair and set for an all day, stay-in-place hold. The strength of the hold is determined by the amount of product used, your whiskers length/thickness and weather conditions. We made this wax more robust than most, in order to tackle both the hottest and coolest of climes.

We have been creating and developing small batch artisan beauty products for many years. Each tin is free of questionable chemicals often used in the beauty industry. We use only the highest quality organic ingredients and keep our inventory low to ensure the freshest product possible.

- 100% Natural and Made to Work
- We package the wax in a recyclable pocket sized tin with a threaded cap that twists on tight so it's great for travelling wherever the road leads you.
- Scrape a small amount with the back of your thumbnail, rub between fingers to melt and warm first then apply in desired fashion to facial hair. Don't go overboard with this product, you can always add more to get your look just how you like it. And that's all it takes.
- Contains a blend of 100% Natural Beeswax, Oils, Butters and Vitamin E.

**NOTE:** Products are made by hand using natural ingredients. This product contains Natural Beeswax which means that it is yellow in the tin but goes on clear and it comes in a convenient tin and washes out with soap and water. As with all herbal skin products, we recommend patch testing first to make sure you aren't sensitive to any of the ingredients. Although these are natural they are still powerful, and allergies can develop even if you've never been allergic before.
