This is a dual action beard shampoo and beard conditioner combo that will deep clean your beard, naturally, without stripping it of its natural oils like normal shampoo. Our Beard Wash will gently cleanse both facial hair and the sensitive skin underneath, leaving both beard and face clean, soft, manageable and smelling great.

Men who maintain beards of any length may face numerous problems. For starters, using hair shampoos on the beard can leave the skin underneath quite dry. Some men even wash their beards with facial soap and shower gels, and this leaves residues behind.

While focusing on the real hair issues faced by gentlemen, we have handpicked ingredients and developed products that provide a natural solution. The Beard Wash contains a powerhouse of combined ingredients including Conditioning Pro-Vitamin B5 and Wheat Protein to hydrate, strengthen and repair dry, damaged or weak hair. It leaves your skin and beard happy and healthy! Thoroughly cleanses and deeply conditions; leaving your beard feeling soft, clean and manageable.

Our Beard Wash lathers up thick and has a natural mild clean and fresh scent. A little goes a long way, it lasts approximately 3 times as long as conventional shampoos! Plus this Beard Wash cleans and conditions without the addition of a separate conditioner, double win!

Our vision is to continue to produce ethically sourced, cruelty-free, natural and organic products that work, with visible results. All of our products are formulated with no nasties, plenty of ethics, and fabulous ingredients so every bottle is free of questionable chemicals often used in the beauty industry.

100% NATURAL. HIGH PERFORMANCE. MADE TO WORK.
